EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.00
Maharshi Arvind Sikshan Sansthan	Class XII (CBSE)	2017	71.80%
S G Public School	Class X (CBSE)	2015	9.00%

SCHOLASTIC ACHIEVEMENTS

- **Specialist** on Codeforces.
- Solved **2500+ Data Structures & Algorithms** problems across platforms like Codeforces, CodeChef, LeetCode, and AtCoder **(100+ contests)**.
- Achieved a **Top 1.1% finish** in **LeetCode** Biweekly Contest 190.
- Secured **8th rank** in the official **IIT Hyderabad Deep Learning** course hackathon for image classification, designing a from-scratch model (no pre-trained weights allowed).

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Pivot Pvt Ltd

- Built and maintained **RESTful APIs** (**CRUD operations**) and an **admin panel** to support core platform features and internal operations.
- Integrated **Razorpay** for payments and **Mixpanel** for analytics, enabling secure transactions and data-driven product decisions.
- Automated **Google Meet scheduling** with auto-cancellation and rescheduling logic for mentor-mentee sessions.
- Designed dynamic user **onboarding flows** with profile setup and led **Strapi CMS** migration to streamline content management.

PROJECTS

Vision-Language-Action (VLA)

- **Researched Vision-Language-Action (VLA)** models for language-conditioned robotic manipulation, focusing on the seamless integration of multimodal visual observations and natural language instructions for continuous action generation.
- **Evaluated the RECAP Reinforcement Learning framework** on the LIBERO simulation benchmark, analysing its ability to combine human demonstrations and autonomous experience using value-function advantage estimation and flow-matching policies.
- **Fine-tuned a 3-billion-parameter VLA model** using Low-Rank Adaptation (LoRA) across an 8-GPU distributed cluster, resolving NCCL communication bottlenecks and deploying the resulting policy via a low-latency, WebSocket-based remote inference server.

StatA - Realistic Test-Time Adaptation of Vision-Language Models gitHub collab

- Reproduced the **StatA (CVPR 2025 Highlight)** framework for **CLIP-based VLMs**, diagnosing and resolving a critical function-aliasing bug that silently suppressed the adapted solver.
- Engineered **3 novel algorithmic enhancements** to the **Expectation-Maximization (EM)** adaptation procedure, consistently outperforming the baseline across **4 benchmark datasets** and varying batch sizes.

Reddit Clone Link gitHub

Tech Stack**:** Node.js, Express.js, MongoDB, React.js, Firebase, JavaScript, HTML, CSS

- Built a full-stack **Reddit** clone featuring **user authentication**, subreddit creation/management, and text/image/link posts with upvoting, downvoting, and commenting.
- Implemented **infinite scrolling** for efficient post browsing and **real-time synchronisation** of comments and vote counts for consistent UI state across interactions.s

POSITIONS OF RESPONSIBILITY

Teaching Assistant -- Data Structures and Algorithms, Data Structures and Applications

- Data Structures & Algorithms, Data Structures and Applications: conducted doubt-solving sessions and guided students in problem-solving approaches and time/space complexity analysis
- Evaluated programming assignments and lab work, providing feedback on correctness and implementation; assisted students in debugging and optimising C++ solutions

SKILLS

Languages: C++, Java, Python, JavaScript

CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, Multithreading & Concurrency, Synchronisation, Semaphores

Backend: MySQL, Node.js, Express.js, REST APIs, MongoDB

Frontend: React.js, Redux, HTML, CSS, Tailwind CSS

Tools & Technologies: Git, GitHub, Firebase

CERTIFICATES

- Full Stack Web Development - Certificate
- Problem Solving (Intermediate) - Certificate
- SQL- certificate
