EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	6.74
Hyderabad Institute of Excellence	Class XII (Telangana State Board of Intermediate Education)	2023	93.60%
Montessori High School	Class X (Board Of Secondary Education ,Telangana)	2021	10.00%

PROJECTS

Lightdash

- Developed and contributed to a full-stack business intelligence platform for exploring, analyzing, and visualizing data.
- Integrated dbt-based data models and semantic layer**s** to provide consistent metrics and dimensions for analytics.
- Integrated PostgreSQL and database-driven services for application data and development workflows.
- Implemented and worked with AI-powered analytics capabilities, including structured AI tools, semantic-layer interactions, and data applications, as reflected in the project's changelog
- Worked with Docker, PostgreSQL, MinIO, headless browser services, and development tooling for running the complete application stack.

Octochains--Parallel Multi-Agent Reasoning & Consensus Framework

- Built with Python, Pydantic, multi-agent orchestration, parallel processing, and LLM integration.
- Developed a lightweight, model-agnostic Python framework for multi-agent AI decision-making.
- Enables multiple specialized AI agents to analyze complex problems independently in parallel.
- Uses isolated execution to reduce peer influence and groupthink between agents.
- Includes Synthesizer, ConflictChecker, and WeightedSynthesizer for structured decision aggregation.
- Provides deterministic audit trails for transparent and reproducible decision-making.

AI-powered Human Action Segmentation System

Developed an AI-based system to segment and classify human actions from video sequences using deep learning and computer vision. Implemented temporal modelling techniques for precise action boundary detection, improving recognition accuracy over baseline models. Optimized the pipeline for real-time inference, enabling potential applications in surveillance, healthcare, and human-computer interaction.

Voicebox

- Shipped a built-in MCP (Model Context Protocol) server with Streamable HTTP + stdio transport, exposing speak/transcribe/list_captures/list_profiles tools so any MCP-aware agent speaks through user-owned cloned voices
- Integrated OpenAI Whisper STT with a local Qwen3 LLM for dictation refinement (loop-stripping, filler removal) and per-voice personality rewriting

ML with AWS & Azure Development

- Designed and deployed **end-to-end ML pipelines** on AWS SageMaker and Azure ML Studio for model training, testing, and real-time inference.
- Implemented ML workflows on **Azure Blob Storage, Azure Functions, and AKS**, enabling containerised model deployment at scale.

SKILLS

- **Languages :** c/c++, Python, JavaScript, HTML, CSS, SQL,

- **Libraries :** C++ (STL),NumPy, Pandas, Matplotlib, Scikit-learn
- **AI/ML:** Machine Learning, Deep Learning, LLMs, Transformers, LangChain, Multi-Agent Systems
- **GEN AI :** LLM Orchestration, Prompt Engineering, Model Integration, AI Agents, Consensus & Reasoning Systems
- **Databases:** PostgreSQL, SQL
- **Dev Tool** : Git, VS Code, Linux, Colab, Jupyter
- **Development:** Version Control, Debugging, Testing, API Integration, Open-Source Development

RELEVANT COURSES

Mathematics Courses: Probability and Random Processes, Calculus, Vector Calculus, Differential Equations, Complex Variables, Introduction to Statistics

Artificial Intelligence courses: Probability and Random Processes, Artificial Intelligence, Foundation of Machine Learning

Biomedical & Data: Medical Image Processing, Biomedical Data Analysis, Statistical Analysis, Signal Processing

EXTRACURRICULAR

Member of **National Sport Organizations -** IITH (Cricket)

Interested in sports , International affairs , Travelling

POSITIONS OF RESPONSIBILITY

- **COORDINATER** at Tinker's lab
- **UG Mentor** at sunshine buddy
