EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.51
Sana Junior College, Nanded	Class XII (Maharashtra)	2022	85.83%
Sana International School, Nanded	Class X (CBSE)	2020	95.60%

WORK EXPERIENCE

Nikko Co., Ltd. (Japan) -- AI & Computer Vision Intern:

- Developed a computer-vision pipeline to estimate sand moisture from multi-view conveyor-belt video, working with heterogeneous camera conditions and real-world industrial data.
- Experimented with classical CV and ML approaches including **HSV-S, texture roughness, edge sharpness, Random Forest, and ConvLSTM**; analyzed model failures across camera viewpoints to identify cross-camera generalization as a key deployment challenge.
- Designed and trained a **4-layer ConvLSTM model** using multi-camera video sequences, improving robustness toward camera-agnostic moisture prediction.
- Received **Letter of Appreciation** from Nikko Co., Ltd. for outstanding performance throughout the internship.

SKILLS

- **Programming:** C++, Python, C, SQL.
- **AI/ML:** Machine Learning, Deep Learning, Computer Vision, NLP.
- **Libraries:** NumPy, Pandas, OpenCV, PyTorch, Matplotlib.
- **Product & Analytics:** Data Analysis, Product Metrics, Experimentation, Problem Solving.
- **Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code.
- **DSA:** Data Structures & Algorithms; 500+ problems across LeetCode, Codeforces and other platforms.

PROJECTS

AI Personalized Content Discovery Platform:

- Designed a personalized content discovery platform that recommends articles based on user interests and interaction history using **content embeddings and similarity-based ranking.**
- Implemented feedback signals such as likes, skips, and saves to continuously refine recommendations and evaluated the system using **engagement metrics such as CTR and content diversity.**

Predictive Maintenance using Machine Learning:

- Developed **ML model in Python** to analyze machinery sensor data (temperature, vibration, pressure) and predict potential failures in advance.
- Applied **time-series analysis, feature engineering, and anomaly detection** to improve reliability and reduce downtime through proactive maintenance scheduling.

High-Performance Microscopic Image Stitching and Enhancement:

- Developed a **Python-based** solution to stitch approximately 400 microscopic images into a single high-resolution, magnified image using libraries like **OpenCV, NumPy, and Imutils.**
- Implemented parallel processing techniques (e.g., **multiprocessing and threading**) to significantly reduce computation time. Applied advanced image preprocessing, feature matching, and alignment algorithms for precise and seamless stitching.

POSITIONS OF RESPONSIBILITY

Internship Coordinator -- Office of Career Services, IIT Hyderabad

- Coordinated internship-related activities between students, recruiters, and the OCS team, ensuring smooth execution of applications, tests, interviews, and related processes.
- Resolved student/recruiter issues by coordinating across stakeholders and managing time-sensitive recruitment activities.

Assistant -- Office of Career Services, IIT Hyderabad

- Supported placement and internship operations, coordinating with students and the OCS team across applications, assessments, interviews, and recruitment-related activities.

Assistant -- Tinkerers' Lab, IIT Hyderabad

- Supported technical workshops and lab activities, coordinating students, resources, and execution of hands-on technical initiatives.

SCHOLASTIC ACHIEVEMENTS

- Received a Gold Medal in IMO (International Mathematics Olympiad)2016.
- Got Shortlisted and Completed the Google Student Upskilling Launchpad Program.

RELEVANT COURSES

- **Product & Entrepreneurship:** Design Thinking, Innovation Management, Marketing Research, Game Theory for Startups, HR & Leadership.
- **Artificial Intelligence:** Introduction to Artificial Intelligence, Foundations of Natural Intelligence, Machine Learning.
- **Mathematics:** Calculus, Linear Algebra, Introduction to Statistics, Probability and Random Processes, Transform Techniques, Mathematical Modelling.
- **Electrical:** Analog and Integrated Circuits, Linear Signal and Systems, Embedded Systems, Control Systems.
