EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	7.64
Narayana	Class XII (SSC)	2023	97.60%
Silver Oaks	Class X (CBSE)	2020	96.60%

WORK EXPERIENCE

Larsen and Toubro:

Supply Chain Management Intern

- **Consolidated PO/WO data from 10+ business units** into a single spend tracker for outsourced fabricated steel structures, exposing raw-material vs. fabrication cost splits that were previously bundled into one vendor price and impossible to benchmark.
- **Interviewed procurement teams across ICs** to map how each one actually bought fabricated structures, **then built a classification of structure categories** and a vendor ranking to show where volume could be aggregated.
- **Drafted an SOP for fabrication contracting** (capped handling margin on raw material, itemized fabrication cost heads, 4% wastage ceiling), projected to **save ~2%** of annual fabricated-structure spend once centralized.
- **Tracked input-cost escalation across pipe procurement** (HR coil, PU paint, zinc, freight) against WPI/BIGMINT indices, mapped the movement to live firm-price orders, and helped contain vendor escalation **claims to a 3-7% realised impact** -- partly by sourcing an alternate paint supplier at no schedule cost.
- **Built a weighted five-KPI vendor scorecard** with tiered ratings tied to specific contractual actions, and analyzed 5 years of quarterly HRC/ERW price data (270+ points) to identify a repeatable Q2-Q3 buying window.

PROJECTS

Climate Air Risk: Integrated Climate and Air Pollution Health Risk Prediction Tool | Ongoing

- Built an **end-to-end data pipeline in Python** to ingest and **preprocess multi-year CPCB air-quality** and meteorological data for Hyderabad stations, **handling missing values via linear interpolation** and structuring station-wise daily datasets.
- **Implemented the CPCB AQI methodology** (pollutant sub-indices, 8-hour averaging for CO and O3) and **computed Wet Bulb Globe Temperature (WBGT)** from meteorological inputs, then designed a **composite Environmental Health Risk Index (EHRI)** from min-max normalized pollution and heat-stress scores.
- Trained and evaluated Random Forest and Logistic Regression classifiers with k-fold cross-validation to predict daily health-risk categories (Low, Moderate, High), measured using precision, recall, and F1 score.

RETAIL SALES ANALYTICS PROJECT (SQL + POWER BI)-

- Developed an **end-to-end Retail Sales Analytics dashboard** using **SQL and Power BI**, analyzing 200+ transactions across products, cities and regions.
- Wrote optimized **SQL queries** for trend analysis, category profitability, discount impact, and geographical insights.
- Designed an **interactive Power BI** report featuring **KPIs, monthly trends, drill-down visuals, and profitability views**.
- Identified key insights such as top-performing categories and city revenue patterns to support business decisions.

SCHOLASTIC ACHIEVEMENTS

Machine Learning Using Python Programming | SWAYAM_NPTEL(IIT-BHU)

- Secured **Elite + Silver Medal Certification**
- **Achieved Top 5% Topper** status among all certified students.

Programming, Data Structures and Algorithms using Python | NPTEL(IIT Madras)

- Secured **Elite + Silver Medal Certification**
- Achieved **Top 5% Topper** Status among all certified candidates

POSITIONS OF RESPONSIBILITY

Coordinator of **Career Cell at Office of Career Services (OCS)**, IIT Hyderabad | 2024-2025

- Drove student awareness and participation in career services across departments through targeted digital platforms.
- Coordinated end-to-end logistics for recruitment drives, including scheduling, venue arrangements, and communication between recruiters, students, and faculty.

Coordinator in **Placement Cell at Office of Career Services(OCS)**,IIT Hyderabad | 2026-2027

- Partnered with recruiters and HR teams to schedule placement drives and manage company onboarding, keeping communication smooth from first outreach through final results.
- Coordinated on-campus logistics for tests, group discussions, and interviews, while supporting students with job descriptions, eligibility criteria, and query resolution.

SKILLS

Languages: C, Python

Technical Knowledge: Data Structures and Algorithms, Machine Learning, Data analysis and visualization, HTML & CSS, SQL

Tools: Microsoft Excel, Advanced Excel, Power BI, PowerPoint, HubSpot(beginner)

Soft Skills: Team-work, Problem solving, Adaptability, Communication, Time-Management

EXTRACURRICULAR

Member of **NSS(National Service Scheme)** , IIT Hyderabad
