EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.90
N.E.S. Science College, Nanded	Class XII (Maharashtra State Board)	2023	82.33%
Tiny Angel's School, Nanded	Class X (Maharashtra State Board)	2021	97.20%

SKILLS

Programming Languages: SQL, Python, C, C++, Bash

Analytics: Funnel Analysis, Cohort Analysis, A/B Testing, Hypothesis Testing, Segmentation, KPI Design

Libraries: Pandas, NumPy, SciPy, Statsmodels, Matplotlib, Plotly, Scikit-learn, LightGBM, SHAP, Optuna

Software and Tools: BigQuery, PostgreSQL, MS Excel, Streamlit, Git, Docker, Linux, LangChain, LangGraph, FastAPI, MCP

SCHOLASTIC ACHIEVEMENTS

- **Overall Winner, Mitsubishi Hackathon 2025** (Mitsubishi Electric, Japan; 10-day): built an **agentic crime-detection system** on **existing CCTV networks** that alerts the nearest **guard, police, fire or ambulance unit** with **human-in-the-loop** confirmation
- **Smart India Hackathon Finalist:** Selected to represent IIT Hyderabad for designing a portable, non-contact device for at home glaucoma detection

WORK EXPERIENCE

AI Software Developer Intern | STN 10xScale *(Jan'26 - Jun'26)*

Hire10x (AI recruiting copilot)

- Built a recruiting agent on an **MCP server with 11 SQL tools** and human-in-the-loop approval, letting recruiters shortlist, rank and post jobs in **one chat message** instead of manual JD search and filtering
- Designed **LLM scoring filters** (Relevant Experience, Open-to-Work) that score every application against its JD, ranking **5,000+ candidates** by fit and likelihood to switch

AgentFlow (agent framework)

- Engineered an **evaluation framework from scratch** with **callback/publisher tracing** of node visits, tool calls and token usage, now **adopted by the team** to test agent workflows
- Implemented **13 evaluation criteria** (LLM-judged and deterministic), an **LLM user simulator** for multi-turn testing, and parallel runs with **HTML/JSON reports**

ResumePilot (AI resume builder)

- Cut LLM response latency **52% (18.3s to 8.8s)** by parallelizing LLM calls, logging token usage and removing redundant calls

PROJECTS

E-commerce Product Analytics & Conversion Optimization | *BigQuery SQL, Python, Streamlit, GA4*

- Analysed **4.29M+ GA4 events (270K+ users)** in BigQuery SQL to build the purchase funnel; found that only **19.69%** of product-view sessions reach cart.
- Segmented users by new vs returning, device and channel: returning-user sessions converted **3.1x** better (4.23% vs 1.36%), and Month-1 retention was low at 2.52% to 5.84%.
- Sized the top 5 underperforming products: closing half their gap could add **~403 purchases and ~$28.9K revenue**; designed an A/B test (7,944 per variant) and built a Streamlit dashboard.

Personalized Offer Ranking Model | *Python, LightGBM, Optuna, SHAP* | *Amex Campus Challenge 2025*

- Improved offer ranking quality (MAP@7) by **195% (0.180 to 0.531)** by building an **end-to-end learning-to-rank pipeline** with LightGBM, engineering features from **3 auxiliary tables** and narrowing **366 raw variables to 51** using SHAP-based selection
- Tuned model hyperparameters across **847 Optuna trials** (Bayesian/TPE optimization) with the **LambdaRank objective**, directly optimizing for top-rank relevance instead of independent click prediction
- Designed a **5:1 smart negative-sampling strategy** to fix class imbalance without distorting real user behavior, validated via **customer-grouped 5-fold cross-validation** to prevent data leakage

POSITIONS OF RESPONSIBILITY

Internship Coordinator | Office of Career Services (OCS), IIT Hyderabad *(May'25 - May'26)*

- Coordinated the internship process for **100+ students across 10+ companies**, managing test, interview and scheduling logistics and acting as the point of contact between companies and students

Machine Learning Coordinator | Tinkerers' Lab, IIT Hyderabad *(May'24 - May'25)*

- Coordinated a campus-wide hands-on workshop on **Exploratory Data Analysis with Python** as part of an **8 member team**, reaching **100+ students**; helped organize an **ML competition** for club members

Consulting Coordinator | Finance and Consulting Club, IIT Hyderabad *(Aug'23 - May'24)*

- Co-led the planning and execution of **HORIZON**, the club's flagship event, hosting **20+ industry speakers** and **12+ competitions** across consulting and business domains
