EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	9.07
Angel junior college	Class XII (Maharashtra State Board of Secondary and Higher Secondary Education (MSBSHSE))	2019	65.69%
Hume Mc Henry High school	Class X (ICSE)	2017	77.30%

SCHOLASTIC ACHIEVEMENTS

Best Student Innovator, VU-IQube, Vishwakarma University

3rd Prize, Investor Panel, Thapar Entrepreneurs Academy, 2022

Top 10 Design Submissions, IYoung Social Product Design Competition, 2023

POSITIONS OF RESPONSIBILITY

Sub-Head, Marketing & Outreach -- IndiaHCI 2026

Installation Head -- AYAAM Design Festival, IIT Hyderabad

SKILLS

Research & Design Methods

User Research · Design Research · User-Centred Design · Design Thinking · Systems Thinking · Ideation · Concept Development · Ergonomics · Workflow Analysis

Product & Industrial Design

Product Design · Industrial Design · Product Semantics · CAD Modelling · Physical Prototyping · 3D Printing · Manufacturing Constraints

UX & Interaction

Interaction Design · User Flows · Information Architecture · Wireframing · Digital Prototyping · Inclusive Design

Human-AI Interaction

Human-AI Interaction · AI-Assisted Research Synthesis · AI Prototyping · Trust & Explainability

Tools

Fusion 360 · Rhino · SolidWorks · Blender · KeyShot · Figma · Framer · Photoshop · Illustrator

Physical Computing

Arduino · ESP32 · Sensors · IoT Prototyping

RELEVANT COURSES

Design Research · Product Semantics · Advanced Materials in Design · Space Design · Interaction Design · Ergonomics

EXPERIENCE

Product Designer -- Indic Inspirations

Jan 2023 - Jul 2025

- Worked on projects for **ISRO, Indian Railways, and the TATA Group**, developing CAD models, functional prototypes, and design systems within real manufacturing and stakeholder constraints.
- Contributed across the end-to-end design process, including **research, ideation, CAD modelling, prototyping, and client-facing presentations**.
- Translated design concepts into manufacturable solutions while balancing user requirements, technical feasibility, and stakeholder constraints.

Product Design Intern -- Bamboo Tales

May 2022 - Jul 2022

- Researched **bamboo as a design material** and explored its applications within product development.
- Contributed to ideation and prototyping for a product line rooted in **craft and rural manufacturing**.
- Explored the relationship between material properties, traditional craft practices, and contemporary product design.

EXTRACURRICULAR

Theatre Practitioner

- Performance, storytelling and collaborative production.

Arts & Crafts

- Physical making, craft and fabrication.

PROJECTS

Vikram Lander Scale Model -- ISRO

- Developed a 1:25 scale model of ISRO's Vikram Lander through precision CAD modelling and physical production, maintaining dimensional accuracy and controlled surface finish.

Indian Railways Wall Museum

- Designed a modular exhibition system incorporating spatial storytelling and wayfinding within the heritage context of Indian Railways.

ORBITER -- Orbital Sander

- Redesigned an orbital sander with focus on grip ergonomics, vibration reduction and manufacturability under real-world production constraints.

Stamp and Play

- Developed a tactile game and activity system for children with diverse abilities through research-led ideation and exploration of material affordances.
