EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	7.38
JAWAHAR NAVODAYA VIDYALAYA MEERUT , UP	Class XII (CBSE)	2023	80.67%
JAWAHAR NAVODAYA VIDYALAYA MEERUT , UP	Class X (CBSE)	2021	86.80%

SUMMARY

Engineer graduating July 2028 with hands-on experience across the full software development lifecycle -- architecture, development, testing, and production deployment. Strong grounding in data structures, algorithms, and object-oriented design, applied across three independently shipped full-stack platforms built for scalability, reliability, and security

SKILLS

- **CS Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP),System Design , Problem Solving
- **Programming Languages:** Python,C++, JavaScript (ES6+), SQL, HTML5, CSS3
- **Backend and APIs:** Node.js, Express.js,FastAPI, REST API design , Firebase Authentication
- **Frontend:** React.js, Redux Toolkit, Tailwind CSS
- **Databases:** MongoDB, SQLite, SQL (CTEs, ETL pipelines)
- **Tools & Deployment:** Git, GitHub, Postman, Vercel, Render, Jupyter Notebook, Google Colab
- **Data Analysis:** Pandas, NumPy, Matplotlib, Power BI

PROJECTS -- END-TO-END OWNERSHIP

Interview IQ - AI-Powered Mock Interview Coach |Github - Demo

React 19, Node.js, Express.js, MongoDB Atlas, Firebase, OpenRouter AI, Razorpay

- **Owned the full lifecycle** of a production SaaS platform end-to-end -- architecture, backend/frontend development, testing, and deployment -- using React 19, Express.js, and MongoDB Atlas.
- **Designed a secure authentication layer** with Google OAuth via Firebase Auth, prioritizing reliability and data security across user sessions.
- **Integrated** an interactive voice-mock simulator leveraging the browser's native **Web Speech API** for real-time speech-to-text response collection and detailed performance scoring.
- **Engineered centralized state management** with Redux Toolkit to keep the app scalable and maintainable as features grew.

DocBuddy -- Privacy-First PDF Editor & Utility Suite Github - Demo

React, Node.js, Express.js, PDF.js, pdf-lib, Multer, Vercel, Render

- **Independently designed and shipped** a full-stack system end-to-end, from client-side rendering architecture to backend REST APIs to production deployment on Vercel/Render.
- **Prioritized security and reliability** via a self-purging temporary-file architecture (60-second sweep, 10-minute auto-cleanup) and end-to-end PDF encryption/decryption.
- **Implemented core document algorithms** in an Express/pdf-lib backend -- multi-file merge, page-range splitting, compression, and buffer-level manipulation -- built for scale on files up to 50MB.
- **Built an interactive canvas-based previewer** with PDF.js, applying OOP patterns to manage page state (rotate, reorder, delete) in real time.

Vendor Performance Analysis - Retail Inventory & Sales | GitHub | Demo

SQL, Python, FastAPI, JavaScript, Chart.js, HTML/CSS, Render

- **Objective:** Analyzed vendor efficiency and profitability to support strategic purchasing and inventory decisions.
- **Developed and optimized** a complex **SQL ETL** pipeline to build an aggregated summary table from multiple tables, using **CTEs** to reduce processing time for large datasets.
- **Applied algorithmic problem-solving** through Exploratory Data Analysis and hypothesis testing in Python to evaluate vendor profitability and inventory turnover
- **Identified** over-dependence on the top 10 vendors (**65.7%** of purchases) and uncovered **$2.71M** in unsold inventory from low-performing vendors.

CERTIFICATIONS & EXTRACURRICULAR

- **CEFR C2** English Proficiency | Credential
- FLY-Scholar Leadership Program - **Competitiveness Mindset Institute (USA)** | Credential
- Represented **IIT Hyderabad** in the **57th Inter IIT Sports Meet**t (Athletics - 5 km Run), held at IIT Indore (December 2024) | Certificate
