EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	7.36
Little Step School, Borgaon	Class XII (Board Of Secondary Education, Madhya Pradesh , Bhopal)	2024	81.40%
Little Step School, Borgaon	Class X (Board Of Secondary Education, Madhya Pradesh,Bhopal)	2022	84.40%

WORK EXPERIENCE

Freelance Software Engineer | Veda AI | Remote *(May 2026 - June 2026)*

- Hired to build an AI tool that automatically generates assessment papers from a teacher's prompts, removing hours of manual question-paper work.
- Built the backend using Express.js and MongoDB, with Redis and BullMQ handling paper generation in the background so the app stays fast and responsive.
- Added a backup AI model that automatically takes over if the main one fails or runs out, so generation doesn't stop.
- Added real-time progress updates and retry logic, so users can track status and a single failed attempt doesn't break the whole process.
- Delivered a working product that teachers actually use to generate and download assessment papers.

SKILLS

Languages: C++, Python, JavaScript, TypeScript, HTML, CSS

Web Development: React.js, Node.js, Express.js, FastAPI, REST APIs

Databases: SQL, PostgreSQL, MongoDB

Tools: Git, GitHub, VS Code

Competitive Programming: LeetCode (400+ Problems), Codeforces (Max Rating: 1305)

Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

PROJECTS

Veda AI - Assessment Paper Generator | **Live**

- Built an AI tool that automatically generates assignments for teachers, with a backup AI model that kicks in if the main one fails or runs out.
- Ran the assignment generation in the background so the app stays responsive while papers are being created.
- Added real-time status updates so users can track progress from draft to completion.
- Built in retry logic so a single failed request doesn't break the whole system.

CoinDash - Crypto Portfolio Platform| **Live**

- Built a cryptocurrency analytics platform that shows real-time market data, tracks portfolios, and gives AI-powered investment insights.
- Combined live price feeds and crypto news into a single dashboard with interactive charts.
- Added caching on the backend to cut down repeated API calls and speed up response times.

- Deployed the app with automated pipelines so new updates go live without manual steps.

Pokedex - Pokémon Explorer

- Built a Pokémon explorer app that pulls real-time data from a public API, with search and filtering to browse Pokémon
- and their stats, types, and abilities.

StreamVault - Video Streaming Platform

- Built a full video streaming platform with secure login and role-based access for different types of users.
- Integrated a payment gateway for subscriptions with verified, secure transactions.
- Built an admin dashboard to track users, revenue, and content.
- Optimized the database so queries run faster and stay reliable under load.

SCHOLASTIC ACHIEVEMENTS

Solved 750+ Data Structures and Algorithms (DSA) problems across various coding platforms

LeetCode (400+ Problems, **Max Rating: 1746)**

POSITIONS OF RESPONSIBILITY

Coordinator, PR & Multimedia | Milan, IIT Hyderabad | 2025-2026

- Managed social media promotions and multimedia content to increase event visibility and audience engagement.
- Coordinated with organizing teams to execute publicity campaigns and promotional activities

Manager, Operations | E-Cell, IIT Hyderabad | 2025-2026

- Coordinated operational activities for entrepreneurship events, ensuring smooth execution and timely completion of assigned responsibilities.
- Collaborated with club members to manage event logistics, scheduling, and coordination across different teams.

Assistant Manager, Operations | E-Cell, IIT Hyderabad | 2024-2025

RELEVANT COURSES

Mathematics: Calculus I, Calculus II, Differential Equations, Elementary Linear Algebra

Programming: Fundamentals of Scientific Computing, Artificial Intelligence, Computational Methods in Materials Science
