EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2026	6.33
GOUTHAMI JR COLLEGE	Class XII (Board of intermediate Education telangana)	2023	82.10%
TSRS BOYS SARVAIL	Class X (board of secondary Education telangana)	2021	10.00%

SCHOLASTIC ACHIEVEMENTS

Professional Machine Learning & AI Certification:

Completed intensive Machine Learning & Data Science training/internship at 1stop.ai, covering Deep Learning, Computer Vision, and Predictive Analytics.

SKILLS

Mechanical & CAE/CAD:

ANSYS (Fluent, Workbench), Solid Edge

Used for CAD modeling, mechanical design, engineering simulation, and analyzing mechanical systems.

Engineering Methods:

Finite Element Analysis (FEA), Computational Fluid Dynamics (CFD), DfMA

Used for structural and fluid-flow analysis, simulation-based engineering, and designing products with manufacturability in mind.

RELEVANT COURSES

Systems & Manufacturing:

Kinematics & Dynamics, Manufacturing Science, Control Systems

Thermo-Fluids & Simulation:

Computational Fluid Dynamics (CFD), Thermodynamics, Fluid Mechanics, Heat Transfer

Design & Solid Mechanics:

Finite Element Analysis (FEA), DfMA, Solid Mechanics, Machine Drawing

PROJECTS

Conveyor Belt with Geneva Drive|*Design & Fabrication*

Designed, modeled, and fabricated a functional mechanical prototype of an intermittent conveyor system based on a Geneva drive mechanism. The project involved translating the mechanism concept into a working physical system capable of producing controlled intermittent conveyor motion.

3D Printed Scale Ship Model|*CAD & Additive Manufacturing*

Created a detailed CAD model of a vessel shell and converted the digital design into a physical prototype using polymer-based 3D printing. The project involved detailed geometric modeling and fabrication of the scale ship while maintaining the intended shape and structural form of the CAD design.

RC Hovercraft with Ducted Fan Drive |*Propulsion & Design*

Modeled and assembled an RC hovercraft incorporating a ducted-fan thrust system for propulsion and air-cushion lift. The design work included consideration of weight distribution and overall configuration to support stable operation of the hovercraft.

2D Turbulent Flame Combustion Simulation|*CFD*

Performed a 2D turbulent hydrogen-air flame simulation in ANSYS Fluent using the Eddy Dissipation Model. The simulation was used to examine the resulting thermal and species distributions, providing insight into combustion behavior through analysis of temperature and species contours.

Formula Race Car CAD Modeling | Automotive Design

Developed a CAD model of a formula race-car chassis with attention to the packaging and spatial requirements of major vehicle systems. Performed clearance checks around steering, suspension, and powertrain components to ensure the modeled components could be accommodated within the chassis layout

EXTRACURRICULAR

Sports & Athletics: Active participant in campus sports, playing regular matches of Cricket, Football, and Badminton in inter-hostel tournaments.

Competitive & Casual Gaming: Passionate about strategy, simulation, and tactical video games, participating in local and online casual gaming sessions

POSITIONS OF RESPONSIBILITY

Milan Hospitality Coordinator, IIT Hyderabad

- Coordinated and managed hospitality activities for institute events, ensuring smooth arrangements and proper coordination among teams.
- Handled on-ground hospitality operations, including guest coordination, accommodation support, refreshments, and event-related requirements.
- Assisted in managing participants and guests while ensuring timely support and smooth execution of events.
- Worked closely with student teams and event organizers to address hospitality requirements and maintain effective coordination throughout the event

NSS Volunteer:

Participated in community service activities, social awareness programs, and various volunteering initiatives.
