EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	6.96
pragati public sr sec school	Class XII (cbse)	2022	77.40%
st pauls sr sec school	Class X (cbse)	2020	76.60%

WORK EXPERIENCE

Technical intern - AI *(Wizlearnr)*

- Built a gamified math learning module using Phaser 4 and vanilla JavaScript, featuring a dynamic cashier simulation with real-time billing, difficulty-tiered question pools, and intelligent item-unit substitution via a custom-built question generation engine.
- Designed and integrated a student learning progress pipeline using Google Cloud SQL (PostgreSQL), building a Node.js sync server with transactional upserts across student_learning, student_words, and student_word_attempts tables.
- Integrated on-device ML inference using HuggingFace Transformers.js and ONNX Runtime Web, running fine-tuned English/Telugu audio transcription and image recognition models entirely in-browser via WebGPU -- no server round-trips required
- Built a Teacher Dashboard and multi-role authentication flow (Teacher / Student / Guest) with profile context management using React Context API and react-router-dom

EstatePlus -- Real Estate Lead Management Platform *(SaaS, Startup)*

- Built a multi-tenant SaaS CRM for real estate using React 19, TypeScript, Vite, and Firebase (Firestore + Auth), enabling multiple client companies to manage leads, inventory, and teams in isolated environments.
- Developed an AI-powered feature using the Gemini API and a PDF parsing pipeline to assist agents with property-related queries.
- Integrated Google Maps API for geo-tagged site visit verification and 360° panoramic photo viewer for property listings, enhancing field agent workflows.
- Built a lead lifecycle system with follow-up scheduling, remark tracking, lead transfers between agents, KYC document upload (Aadhaar/PAN), and site visit verification with photo + GPS proof.

PROJECTS

Generative AI Learning Platform *(creates lessons & quizes on given topic):*

- Built an AI-powered platform that auto-generates personalized programming courses from user prompts.
- Integrated YouTube Data API to embed relevant educational videos dynamically.
- Developed quiz generation feature for interactive learning and assessment.
- Designed backend and frontend for course management and user progress tracking.

AI Blog App *(Creates blogs from youtube video)*

- Developed a full-stack AI-powered blog application using Django and React, enabling automated blog post generation from YouTube video transcripts with OpenAI GPT-3 integration.
- Implemented backend services with Django REST Framework, handling audio extraction, transcription (AssemblyAI), and secure CRUD operations.
- Designed and configured PostgreSQL databases, integrating cloud solutions Neon for scalable, remote data storage.
- Automated text-to-blog workflows by orchestrating YouTube audio downloads, fast transcript processing, and contextual blog writing using machine learning APIs

SKILLS

AI & Machine Learning

- PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face Transformers
- LLM Fine-Tuning, Prompt Engineering, RAG Systems, Model Evaluation

- Data Preprocessing, Feature Engineering, Deep Learning, NLP, Computer Vision

Software Engineering & Systems

- Data Structures & Algorithms, OOP, System Design, REST APIs, Microservices
- Version Control (Git/GitHub), CI/CD, Containerization (Docker)

Tools & Frameworks

- FastAPI, Flask, Node.js, NumPy, Pandas, Linux Shell
- Cloud & DB: AWS (S3/EC2), PostgreSQL, MongoDB, Vector Databases (Pinecone)

POSITIONS OF RESPONSIBILITY

Hospitality Coordinator - TedX

- Guest & Speaker Relations**:** Managed end-to-end logistics, hospitality, and accommodation for guest speakers, VIPs, and delegates, ensuring a seamless event experience.
- Crisis Management**:** Resolved real-time ground challenges and scheduling shifts efficiently during high-visibility live events.

Multimedia Coordinator - SciTech

- Media Production & Editing**:** Led the design, video editing, and content creation for promotional campaigns across major technical events and fests.
- Brand Strategy & Reach**:** Formulated visual branding strategies, boosting digital engagement and turnout across council social media channels.
