EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	9.40
Deeksha Centre of Learning PU College, Bengaluru	Class XII (Department of Pre-University Education, Karnataka)	2017	88.67%
Jain Public School, Kanakapura	Class X (Central Board of Secondary Education)	2015	9.80%

WORK EXPERIENCE:

EDF Climate Corps Fellow - Decathlon India

- Selected for the **2026 EDF Climate Corps Fellowship** and matched with Decathlon India as a **Sustainability Project Manager**.
- Evaluated biomass use across supplier sites and developed a supplier-facing assessment tool to recommend pathways for transitioning toward more sustainable biomass.
- Analysed historical **GHG emissions data** to identify hotspots, assess risks, and model future CO emissions scenarios aligned with Decathlon's **SBTi targets**.
- Developed emissions-reduction trajectories for suppliers over the next four years to support progress toward Decathlon's SBTi targets.

Senior Design Engineer - Terex Corporation

- Progressed from Graduate Engineer Trainee to Senior Design Engineer, working on design, engineering calculations and product development of heavy machinery.
- Led NPD backhoe loader design where I improved backhoe lift capacity by **400 kg without increasing fuel consumption** and developed automation that reduced design turnaround time from **8 hours to 3 minutes**.
- Implemented **60+ engineering changes** and collaborated with global engineering and manufacturing teams to resolve production issues.

PROJECTS

M.Tech Thesis -- Multi-Objective Wind Farm Layout Optimization Considering Power Generation and Turbine Fatigue Life

- Developing a multi-objective wind farm layout optimization framework to **maximize annual energy production (AEP) and turbine fatigue life**, integrating analytical wake modelling, wake-induced turbulence, rotor-level inflow assessment and fatigue-load estimation

Wind Farm SCADA Data Analysis & Wake Modelling (GitHub)

- Analyzed 10-minute SCADA data from 21 turbines at the Hill of Towie wind farm using Python; performed data cleaning, time-series validation and turbine-wise wind-speed analysis to support wake modelling and wind farm layout optimization.

Multi-Objective Optimization of Rice Yield & Pesticide Use (GitHub)

- Developed an Artificial Neural Network-based framework coupled with the NSGA-II evolutionary algorithm to optimize agricultural yield while minimizing pesticide usage.

Machine Learning-Based Employee Attrition Prediction (GitHub)

- Developed a data-analysis and machine-learning workflow using IBM HR analytics data for ~1,500 employees to identify workforce patterns and predict employee attrition.

Optimization of Mumbai's Multi-Source Energy Transition (2025-2050) (GitHub)

- Formulated and solved a multi-source energy allocation model in LINGO to satisfy projected electricity demand while minimizing greenhouse-gas emissions across Mumbai's long-term energy transition.

Performance Optimization of a Shrouded Twin-Rotor Wind Turbine (GitHub)

- Implemented actuator-disk-based analytical modelling in Python to reproduce and investigate the performance of a published shrouded twin-rotor wind-turbine configuration.

SKILLS

Data & Programming:

Python, MATLAB, NumPy, Pandas, Scikit-learn, TensorFlow, Keras, Machine Learning, Data Analytics

Tools:

Power BI, Tableau, Teamcenter, QGIS, LINGO

Sustainability & Energy:

Renewable Energy, Wind Energy, ESG, Climate Risk Assessment, GHG Accounting, Supply Chain Sustainability, OpenLCA

Soft Skills:

Communication, Teamwork, Problem-solving, Cross-functional collaboration

POSITIONS OF RESPONSIBILITY

Coordinator - Savinya 2026

Conceptualized and spearheaded "Savinya," an event at the Greenko School of Sustainability, IIT Hyderabad, from ideation to execution.

Placement Coordinator

Currently associated with the Office of Career Services as a Placement Coordinator for my batch, helping with pitching to relevant companies and coordinating OCS activities.

RELEVANT COURSES

Sustainability, Data & Risk:

Analysis and Methods for Sustainable Engineering, GCI Data Science Course (Matsuo-Iwasawa Laboratory), Machine Learning Specialisation (DeepLearning.ai, Coursera), SWOT Analysis and Risk Management

Renewable Energy & Energy Systems:

Wind Energy, Photovoltaic technologies and solar economy, Sustainable Energy Technology: Energy Sources, Energy Efficiency, Storage and Optimization,

Decarbonization:

Chemistry for Sustainable Energy., Carbon Capture, Utilization and Storage, Green Chemistry and Industrial Processes

HOBBIES

Table Tennis, Fiction Reading, AI-Assisted Coding, Fitness
