EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.54
The National High School	Class XII (GSEB)	2024	84.15%
Sadhana Vinay Mandir	Class X (GSEB)	2022	87.67%

SCHOLASTIC ACHIEVEMENTS

- Qualified for the Final Interview Round of the AlgoUniversity Technology Fellowship (ATF) 2025 by clearing multiple competitive coding rounds, ranking among the top 1% of over 250,000 participants across India.

PROJECTS

AI Attendance System

- Eliminated manual attendance by building an AI-powered system using **dlib embeddings**, **Linear SVC**, and **Resemblyzer**, enabling accurate **face or voice based student identification** and **automated attendance**.
- Built and deployed a secure web application using **Streamlit**, **Supabase**, and **bcrypt authentication**, hosting it on **Vercel** and **Streamlit Community Cloud** for **reliable attendance management**.

ATS Resume Analyzer

- Built an AI-powered resume analyzer using **semantic similarity** and **fuzzy keyword matching** against job descriptions to generate accurate, data-driven ATS compatibility scores for candidates.
- Developed a **FastAPI** backend with a **Streamlit** frontend, using an **LLM** to parse resume and job description data, and a rule-based recommendation engine to generate prioritized improvement suggestions with automated PDF reports.

Text Summarizer

- Enhanced long-form text summarization by **fine-tuning a T5 Transformer** on the **SAMSum dataset** using **Hugging Face Transformers** and **PyTorch**, improving abstractive summary quality after **6 training epochs**.
- **Delivered a document summarization service** by deploying a **FastAPI** application that serves the fine-tuned model, enabling on-demand summarization of long-form documents.

Credit Loan Approval Prediction

- **Enhanced loan approval prediction** through **data preprocessing**, **feature engineering**, and **standardization**, transforming applicant data into robust features for reliable machine learning classification.
- **Compared Logistic Regression, KNN, and Gaussian Naive Bayes**, achieving **88% accuracy** while evaluating model performance using **accuracy, precision, recall, and F1-score**.

POSITIONS OF RESPONSIBILITY

ML Core -- Tinkerer's Lab, IIT Hyderabad

- Delivered hands-on Machine Learning sessions during Tinker Fresh, introducing 100+ first-year students to core ML concepts, practical implementations, and real-world applications.

Event Coordinator -- NSS, IIT Hyderabad

- Coordinated community service initiatives, including Swachh Bharat campaigns, walkathons, cleaning drives, plantation drives, and awareness programs.

Operations & Logistics Coordinator -- TEDx IIT Hyderabad

- Coordinated logistics, venue setup, speaker support, and on-ground operations to ensure the smooth execution of TEDx events.

SKILLS

Languages: C, C++, Python, SQL, HTML, CSS

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, OpenCV, PyTorch

AI/ML Concepts: Machine Learning Algorithms, Deep Learning, Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Computer Vision, Data Preprocessing, Model Evaluation, Hyperparameter Tuning

Developer Tools & Deployment: Git, GitHub, Visual Studio Code, Jupyter Notebook, Vercel, Render, Supabase, Streamlit Community Cloud

Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration, Coordination, Time Management

RELEVANT COURSES

Mathematics: Calculus I & II, Elementary Linear Algebra, Differential Equations, Introduction to Probability, Introduction to Statistics, Complex Variables, Transform Techniques

Programming: Introduction to Programming

CERTIFICATIONS

Intro to Machine Learning -- Kaggle

- Built and validated decision tree and Random Forest models on structured housing data, exploring features with Pandas and evaluating performance using MAE.
- Learned to identify and fix underfitting and overfitting through model tuning, then applied these skills in a live Kaggle ML competition submission.

Python -- Kaggle

- Covered core Python syntax, functions, booleans, and conditionals, along with lists, loops, list comprehensions, strings, and dictionaries.
- Learned to work with external libraries, including imports and operator overloading, applying these skills through hands-on coding exercises.
