PROJECTS

EventHub | Campus Event Management Platform

Developed a full-stack campus event management platform using React.js, Node.js, Express.js, and MongoDB. Implemented secure user registration and login using JWT-based authentication, developed RESTful APIs with complete CRUD operations for event management. Integrated features including personalized My Events and Interested Events, event search, category-based filtering, date validation, and automatic filtering of expired events. Designed a responsive user interface for seamless event discovery and personalized event management.

Prime Number Computation Platform

Collaborated in a team to develop a React-Flask web application as part of a Numerical Methods course project. Built an interactive platform for prime number computations, including Mersenne primes, Repunit primes, and Goldbach pairs. Developed backend API endpoints for computational modules and integrated them with the frontend to execute computations and display results.
