EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	7.28
resonance junior college	Class XII (Telangana State Board of Intermediate Education)	2024	89.80%
greenwood high school	Class X (Central Board of Secondary Education)	2022	81.40%

SKILLS

Programming Languages: Java, Python, Kotlin, C, SQL

Technologies / Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Jetpack Compose, Flask, Scikit-learn

Databases: MySQL, Firebase Firestore

Developer Tools: Git, GitHub, Android Studio, IntelliJ IDEA, VS Code, Postman

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, REST APIs, JWT Authentication, Database Management Systems

PROJECTS

FoodHub - Food Delivery Application | Backend API | Android App

Tech Stack: Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, MySQL, Kotlin, Jetpack Compose

- Developed a **full-stack food delivery application** with a **Spring Boot REST API** and an **Android client**.
- Designed and implemented **scalable RESTful APIs** using **Spring Boot**, **Spring Security**, and **JWT authentication** for secure user authentication and authorization with **stateless token-based access control**.
- Implemented **restaurant browsing**, **cart management**, **order placement**, and **role-based access control** following **object-oriented design principles** for **modular and maintainable backend architecture**.
- Integrated the backend with an **Android application** and a **MySQL database** using **Spring Data JPA** and **Hibernate** to **enable efficient, reliable, and consistent data persistence and retrieval**.

Numerical Methods Web Application (Course Project) | GitHub

Tech Stack: Python, Flask, React, Vite, JavaScript, Bootstrap, Chart.js, GMPY2

- Developed a **full-stack web application** integrating a **Flask REST API** with a **React** frontend to solve numerical methods problems, perform Harshad number analysis, and **visualize computational results**.
- Implemented **optimized numerical algorithms** for consecutive Harshad number detection, factorial divisibility analysis, and high-precision mathematical computations using **GMPY2** with **efficient algorithmic optimization**.
- Designed a **responsive user interface** with **React**, **Bootstrap**, and **Chart.js** to visualize computational results, improve accessibility, and **enhance overall usability**.
- Built **RESTful APIs** and enabled seamless frontend-backend communication using **JSON-based requests**, supporting efficient computation, real-time result visualization, and **reliable data exchange**.

Concurrent Producer-Consumer System | GitHub

Tech Stack: C, Linux, System V Shared Memory, System V Semaphores

- Implemented the **Producer-Consumer problem** in C using **System V shared memory** and **System V semaphores** for inter-process synchronization across multiple concurrent processes running on a Linux environment.
- Developed **two producer processes and one consumer process** with a bounded circular buffer, ensuring **mutual exclusion** and preventing race conditions under high concurrent load through careful synchronization design.
- Applied concepts of **Operating Systems**, **Inter-Process Communication (IPC)**, **Concurrency**, and **Synchronization** to build a robust and efficient solution demonstrating strong systems-level understanding.

RELEVANT COURSES

Core Courses: Introduction to Programming, Algorithms, Data Structures and their Applications, Operating Systems, Theory of Computation, Discrete Mathematics for Computer Science

Math Courses: Calculus I, Calculus II, Probability and Random Variables, Intro to Statistics, Elementary Linear Algebra, Differential Equations, Complex Variables

POSITIONS OF RESPONSIBILITY

Web Coordinator, Prayas | 2026 - Present

- Managed the **Prayas website**, publishing updates on outreach programs, educational initiatives, and community engagement activities to improve information accessibility.
- Supported **educational outreach initiatives** aimed at empowering government school students through mentorship, academic guidance, and exposure to higher education opportunities.

Sunshine Mentor | 2025 - 2026

- Provided **academic and personal mentorship** to assigned mentees, supporting their transition to institute life.
- Conducted **regular one-on-one check-ins** and guided students in **goal setting** and **problem-solving**.
- Promoted **student engagement** by connecting mentees with campus resources and extracurricular opportunities.

ACHIEVEMENTS

LeetCode: Solved **450+** problems | Handle - K7J3P8

Codeforces: Max Rating - **1369** (Pupil) | **16+** contests | Handle - Jeevan_Paul
