EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.84
JAWAHAR NAVODAYA VIDYALAYA BALAGHAT MP	Class XII (CBSE)	2023	9.18%
JAWAHAR NAVODAYA VIDYALAYA BALAGHAT MP	Class X (CBSE)	2021	9.16%

SCHOLASTIC ACHIEVEMENTS

- Awarded the **Foundation for Excellence (FFE) Scholarship**, a merit-cum-means scholarship recognized for supporting academically bright students.
- Selected as one of the top students nationwide for the prestigious **CSRL Super 100** program, an intensive academic initiative for high-potential students.

SKILLS

Languages: C, C++, java | **Core CS:** Data Structures & Algorithms, OOP, DBMS, SQL, Computer Science Fundamentals | **Web:** HTML, CSS, JavaScript, Frontend Development, Node.js | **Tools:** Git, GitHub, VS Code | **Strengths:** Problem Solving, Debugging, Time & Space Optimization, critical thinking.

Languages & Certifications: Professional English (C2-C1 Proficiency Level)

PROJECTS

Travel Planner | Next.js, React, TypeScript, Prisma, Neon PostgreSQL, Leaflet, OpenStreetMap, UploadThing

- Built a full-stack travel planning platform with **Next.js, React, TypeScript, Prisma, and Neon PostgreSQL** for creating trips, managing destinations, and organizing ordered itineraries.
- Integrated **Leaflet + OpenStreetMap + Nominatim** for interactive maps, geocoding, reverse geocoding, and location markers without Google Maps API dependency.
- Developed an interactive **3D globe visualization** for viewing trips and destinations geographically.
- Integrated **UploadThing** for trip image uploads ,neon for database and **NextAuth** for user authentication and protected data.

Startup Analyzer (AI Dashboard)

- React , TypeScript, Vite, Google Gemini API Developed an AI-powered dashboard that evaluates startup potential based on founders, market opportunity, innovation, and competition.
- Integrated Gemini 2.5 Flash to generate structured investment-style analyses from startup names, URLs, and uploaded documents.
- Implemented document upload support and persisted user search history using browser localStorage.
- Built a responsive React interface with reusable TypeScript components for interactive AI insights.

- Student-Managment_System

Developed a **console-based Student Management System** using **C++**, implementing **CRUD operations**, **OOP concepts**, **STL vector**, and **file handling** for persistent data storage. Organized the project using **modular programming** (header/source files) to demonstrate object-oriented design, data management, and problem-solving skills.

Technologies: C++, OOP, STL Vector, File Handling (ifstream/ofstream), CRUD Operations, VS Code, Git, GitHub.

TypeScript

- Built a chat application supporting real-time messaging using a TypeScript-based architecture.
- Implemented modular client-server communication and scalable project structure.

- gui-grandeur-suite-86106:Numerical Method problem Solver

- gui-ode-solver

EXTRACURRICULAR

- Solved over **400+ data structures and algorithms problems** on LeetCode, demonstrating strong algorithmic thinking and core problem-solving skills.

- Active member of **Rang De Manch**, the dramatics club of IITH.

- Active member of **NSS.**

TECHNICAL PROFICIENCY

Data Structures & Algorithms and Competitive Programming | C++

- Solved 400+ problems on LeetCode and 100+ on coding ninja, applying arrays, linked lists, trees, graphs, dynamic programming, greedy algorithms and graph traversals.
- Designed optimized **C++** solutions with focus on time and space complexity; regularly debugged and tested solutions across edge cases under contest constraints.
- Built strong foundations in object-oriented programming, DBMS, OS, CN, algorithmic problem solving and software engineering fundamentals.

- Completed the CodeHelp Basics of **C++ Programming certification**, strengthening C++ programming, object-oriented programming, and problem-solving skills.
