EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.17
Narayana junior college	Class XII (TGBIE)	2024	98.20%
Yasoda concept high school	Class X (BSEAP)	2022	94.83%

WORK EXPERIENCE

AI/ML Intern | XylofyAI|*Jun 2026 - Jul 2026*

- Built an Employee Attrition Prediction system on HR analytics data, benchmarking Logistic Regression, Random Forest, and Gradient Boosting classifiers and achieving 0.80 ROC-AUC on the best-performing model
- Developed a House Price Prediction model using regression techniques, evaluating performance with standard metrics (R^2, MAE, RMSE) to guide model selection
- Built a Retail Sales Forecasting & Demand Intelligence system, comparing SARIMA, Prophet, and XGBoost and cutting forecast error (MAE) by ~28% with the selected model
- Applied Python, Pandas, NumPy, Scikit-learn, Matplotlib, and Statsmodels across the full ML lifecycle -- from data preprocessing and feature engineering to model evaluation and deployment

PROJECTS

OmniCart AI -- Intelligent E-Commerce Shopping Assistant | *Python, FastAPI, LangChain, Streamlit, Qdrant, OpenAI GPT-4o, Llama 3.1* | GITHUB

- Architected and deployed a full-stack RAG shopping assistant parsing complex product catalogs to deliver context-aware, inventory-bounded answers.
- Implemented a hybrid LLM routing pipeline that delegates complex queries to GPT-4o while routing simpler tasks to Llama 3.1 via Groq to optimize cost and latency.
- Integrated Qdrant vector database with HuggingFace local embeddings (all-MiniLM-L6-v2) to execute semantic product searches over a commerce store catalog.
- Engineered strict prompt engineering guardrails and category-matching rules to eliminate hallucination risks and prevent semantic mismatch errors.
- Automated local dataset ingestion and text preprocessing using Pandas to convert large-scale raw e-commerce CSV records into searchable vector documents.

Full-Stack Blog Platform | *Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic, JWT, Docker*|**GITHUB**

- Built a full-stack CRUD web application with JWT-based authentication and ownership-based authorization, using FastAPI, async SQLAlchemy, and PostgreSQL.
- Designed RESTful CRUD endpoints for user-owned resources with Alembic-managed schema migrations and Pydantic request/response validation.
- Implemented server-rendered UI with Jinja2 templates and image upload handling; containerized the app and database with Docker Compose for local development.
- Covered auth and CRUD flows with a pytest/httpx test suite.

SKILLS

Programming Languages: C++, Python, C, SQL, MySQL

Machine Learning: Regression, Classification, Time Series Forecasting, Feature Engineering, Data Preprocessing, Exploratory Data Analysis (EDA), Model Training, Model Evaluation

Data Analytics: Data Cleaning, Data Visualization, Statistical Analysis, Business Insights

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, Statsmodels

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code,Docker

RELEVANT COURSES

Mathematics: Calculus, Linear Algebra,Introduction to Probability, Differential Equations, Complex Variables, Transform Techniques,Statistics

POSITIONS OF RESPONSIBILITY

Transport Coordinator | IIT Hyderabad

- Served as the primary point of contact between students and bus drivers for campus transportation.
- Coordinated transportation schedules and communicated route updates to ensure smooth daily operations.
- Addressed student queries and resolved transportation-related issues by coordinating with bus drivers and relevant authorities.
- Ensured timely and efficient transport services through effective communication and coordination.

Assistant Coordinator | Behind The Lens, IIT Hyderabad

- Captured and documented institute events through photography and visual storytelling.
- Collaborated with the media team to edit and curate photographs for official publications and social media.
- Assisted in planning and coordinating photography coverage for campus events and student activities.
