EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	7.65
Narayana Junior College	Class XII (TGBIE)	2024	91.10%
Bhashyam Blooms The School	Class X (CBSE)	2022	93.00%

POSITIONS OF RESPONSIBILITY

Overall Coordinator | Milan 2026-27

- **Leading Milan 2026**, IIT Hyderabad's **annual General Championship**, by managing a **100-member organizing committee** across **8 specialized domains**, overseeing strategy, recruitment, budgeting, sponsorships, operations, hospitality, PR, multimedia, logistics, and event execution.
- **Coordinating** institute administration, sponsors, vendors, and 100+ student organizers to deliver IIT Hyderabad's largest inter-hostel championship, expected to witness **6,000+ cumulative footfall**, while ensuring seamless cross-functional execution across sports, cultural, literary, and technical events.

Departmental Representative | Diesta IITH

- Mobilized high student participation and managed team selections, ensuring strong departmental representation while facilitating seamless communication between participants and the organizing committee
- Streamlined event logistics and promoted professional conduct, leveraging leadership and coordination skills to resolve scheduling conflicts and ensure fair play across inter-departmental competitions.

Inbound Coordinator | International Relations Cell IITH

- Served as cultural liaison and inbound host for a Japanese innovation delegation at IITH -- led campus tours, coordinated cross-department schedules, and bridged communication across language and cultural barriers
- Managed hospitality logistics including accommodation, transport, and itineraries -- built trust quickly with unfamiliar international guests in unstructured, high-context settings

Class Representative | Mechanical Engineering 2024-28

Represented a class of 60+ students, acting as the bridge between faculty and students by resolving academic issues, streamlining communication, and improving coordination for academic activities throughout the 2024-25 academic year.

SKILLS

Programming: Python, JavaScript , C++, SQL

UI/UX Design Tools : Figma, Canva, Wix, Adobe Illustrator, Adobe After Effects

Office Tools : MS Excel , MS PowerPoint , MS Word

PROJECTS

AI Interview Preparation Platform

- Designed and built a full-stack, JWT-authenticated web application end-to-end, structuring the backend (FastAPI, async SQLAlchemy, PostgreSQL) into modular services for maintainability and scalability.
- Implemented a structured resume-extraction pipeline (PDF parsing + Instructor/Pydantic-validated LLM outputs) with a provider-agnostic design.
- Built a project-grilling engine that generates targeted technical questions and structured per-question feedback, with ownership checks and validation to protect data integrity across user requests.

Position Synthesis and Kinematic Analysis

- Synthesized a 2-DOF mechanism using Python to control the precise motion of a circular object through three specific orientations, ensuring purely vertical translation and a 2:1 quick-return ratio
- Conducted full kinematic and dynamic force analysis, including velocity/acceleration diagrams for all joints and a torque-variation plot to identify peak input requirements.

AI-Powered B2B Growth & Lead Intelligence Engine

- Architected an end-to-end agentic workflow automating B2B market research, cutting manual lead profiling from ~15 min per company to under 20 seconds using LLM-driven reasoning pipelines.
- Engineered a web-search agent to autonomously surface target-company operational bottlenecks; structured a JSON data pipeline that maps AI-generated pitches directly into CRM fields, eliminating manual data entry.
- Applied prompt engineering techniques to ensure consistent, structured LLM outputs -- directly relevant to supervised learning and NLP module themes in the ML Summer School.

EXPERIENCE

Project Trainee HRDC , BHEL

- **Analysed turbine construction and manufacturing processes** during an intensive on-site industrial training program focused on heavy engineering equipment
- Thermal design principles of power generation components.
- **Evaluated industrial manufacturing methodologies**, bridging theoretical knowledge of thermal engineering and kinematics with real-world applications in a leading Public Sector Undertaking (PSU).

EXTRACURRICULAR

4th Place - Theme Photography, Inter IIT Cultural Meet 8.0

Represented IIT Hyderabad among 32 IITs at the national-level cultural competition
