PROJECTS

NeuralNet From Scratch | Python, Jupyter Notebook

- Developed a custom neural network library implementing MLPs from foundational principles

- Built modular components: activation functions, loss functions, and optimization algorithms

MiniRedis Cache | Python, FastAPI, Pytest, Threading

- Developed a thread-safe in-memory key-value store implementing **LRU eviction** and **TTL expiration** using OrderedDict and RLock.
- Built a **FastAPI REST API** with cache operations, health checks, statistics, and automatic expiration via lazy deletion and a background sweeper thread.
- Wrote **18 automated pytest test cases** and benchmarking/load-testing scripts, achieving **~1.17M PUT ops/sec** and **~1.38M GET ops/sec** in cache benchmarks.
