EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	7.88
SDMN Vidya Mandir School, Nilokheri Karnal Haryana	Class XII (CBSE)	2024	90.00%
SDMN Vidya Mandir School, Nilokheri Karnal Haryana	Class X (CBSE)	2022	95.50%

SKILLS

Java, JavaScript, C,SQL

HTML, CSS, Bootstrap, React.js, EJS

Node.js, Express.js, REST APIs, MVC Architecture

MongoDB, Mongoose,SQL

Passport.js, JWT, Express Sessions, Role-Based Authorization

Prompt Engineering, Groq API, Llama 3.3, Multi-Agent AI Systems, AI Integration

Cloudinary, Render, Git, GitHub

Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

REST APIs - Scalability - Performance Optimization - Debugging

PROJECTS

HireHub - AI-Powered Applicant Tracking System (ATS)

Live Demo: https://hire-hub-oikh.onrender.com

Key Features: AI Resume Screening - Applicant Tracking System (ATS) - Skill-Based Recommendations - Role-Based Access Control - Cloud Resume Storage - Automated Email Notifications - Admin Analytics

Description:

- Designed and developed a scalable full-stack Applicant Tracking System supporting recruiters, applicants, and administrators using Node.js, Express.js, MongoDB, and React.
- Built an AI-powered resume analysis pipeline using Groq Llama 3.3 that automatically evaluated resumes against job requirements and generated candidate scores.
- Designed an AI-driven recommendation engine matching candidate skills with relevant job opportunities.
- Implemented secure authentication using Passport.js with role-based access control, and integrated Cloudinary (storage) and Resend (email notifications).
- Developed analytics dashboards for monitoring users, job postings, platform activity, and backend performance.

Multi-Agent AI Startup Validation Platform

Live Demo: https://ai-startup-validator-client.onrender.com

Key Features: Multi-Agent AI Analysis - AI Startup Idea Enhancement - 100-Point Startup Scoring - AI Roadmap

Generation - PDF Report Export - Validation History - JWT Authentication

Description:

- Designed and developed a scalable AI-powered platform that transforms startup ideas into structured business proposals using a modular multi-agent architecture.
- Designed a concurrent AI inference pipeline using Promise.all() to execute multiple AI agents in parallel, reducing overall response latency.
- Engineered AI workflows generating startup viability scores, structured reports, business insights, and actionable recommendations.
- Built an AI-powered 3-month roadmap generator producing milestone-based execution plans, priorities, and risk analysis from validation reports.
- Implemented JWT authentication, secure password hashing using bcrypt, protected REST APIs, user-specific validation history, and daily usage limits.

WanderLust - Full-Stack Property Rental Platform

Live Demo: https://wanderlust-airbnb-01.onrender.com

Key Features: Property Listing Management - Secure Authentication - Wishlist System - Review & Rating - Cloud Image Upload - Geolocation Mapping - Search & Category Filtering

Description:

- Designed and developed a scalable full-stack property rental platform supporting secure property listing management, CRUD operations, and Cloudinary-based media storage.
- Implemented authentication and role-based ownership middleware using Passport.js and Express Sessions to restrict listing and review edits to their owners.
- Integrated Cloudinary and Mapbox APIs to provide reliable media storage and geolocation services for location-aware listings.
- Engineered a wishlist system and a review/rating system, letting users save favorite properties and post feedback on stays.
- Optimized MongoDB queries for search and category filtering while implementing reusable MVC architecture, Joi validation, and centralized error handling.
