Sankuratri Kavya Anvitha

ee24btech11056@iith.ac.in | anvithasankuratri@gmail.com | +91 9398651615 | LinkedIn | GitHub

EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.19
Sri Chaitanya	Class XII (CBSE board)	2024	96.60%
Sri Chaitanya	Class X (State board)	2022	97.16%

SKILLS

Languages : C-language,Python,Verilog

Circuit Tools : LTspice, Altium.

Developer Tools : Git, VS Code, LaTeX

RELEVANT COURSES

Core Courses : Digital systems,Analog Electronics,Signals & systems,Control systems,Power systems,Machine learning.

Math Courses : Calculus,Linear Algebra,Probability.

Computer Science : Introduction to programming(C-language),Data structures and algorithms

PROJECTS

Sequence Detector

- Designed and implemented an overlapping 11011 sequence detector using a Moore finite state machine (FSM) with JK flip-flops.
- Derived and minimized the JK excitation logic using Karnaugh maps (K-maps) and verified the sequence detection operation.

MOD-100 Up/Down Counter using Digital ICs

- Designed and implemented a MOD-100 up/down counter using JK flip-flops to count from 00-99.
- Integrated push-button controls for increment/decrement and built and tested the circuit using digital ICs.

FIR Filter Design using Verilog

- Implemented pipelined and non-pipelined FIR filters using Verilog HDL.
- Generated input signals and FIR coefficients using Python and verified the filter output.

FFT (Fast Fourier Transform)

- Implemented a Radix-2 8-point FFT with streaming input using Verilog HDL.
- Used a pipelined architecture and verified the output using Python-generated results.

EXTRACURRICULAR

- Active member of the National Service Scheme (NSS).
- Participated in community service activities, including visits to old-age homes and orphanages.
- Took part in plantation drives and Swachh Bharat cleanliness campaigns.
