EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	0.00
Fergusson College	Class XII (Hsc - maharashtra state board)	2024	87.50%
Wisdom High International School	Class X (Icse)	2022	96.80%

SKILLS

- **UX Skills:** User Research (Secondary & Primary), User Journey Mapping, Empathy Mapping, Information Architecture, Prototyping, Usability Testing.
- **UI Design:** Interface Design, Visual Hierarchy, Design Systems, Accessibility-Focused Design, Typography.
- **Design Tools:** Figma, FigJam, Adobe Illustrator, Indesign, Fresco, Canva.
- **Methodologies:** Design Research, Creative Direction, Layout composition, Generative AI Workflows, Rapid Prototyping, Cross-functional Collaboration.

PROJECTS

Eudaimonia - Support Platform for Acquired Disability

1. *Research:* About **acquired disability,** people who become disabled after an incident and rebuilding identity. Frame the core problem using **secondary research**, **empathy mapping**, and **Universal Design principles.**
2. *Ideation:* Used **qualitative research methods** (storytelling, cultural probes, Participatory Action Research) to shape the concept. Ran **rapid ideation sprints** (30 concepts, Crazy 8s) and evaluating using scoring matrix to **balance desirability with design feasibility.**
3. *Prototyping:* Did **rapid low-fidelity physical prototype** and **usability testing** with **9 participants** to validate the design direction. Leveraged **AI-assisted UI design** to prototype and refine the platform's website, then iterating based on **user testing insights**.

IITH Pravesha - Campus Navigation System

1. *Research:* **Analyzing** existing wayfinding systems to benchmark best practices. Primary research through **survey (26 responses)** and **user interviews,** 70% of students do struggle with confusing campus roads.
2. *Synthesis:* Built **user journey maps,** identified **key pain points** and extracted **empathy-driven insights** focusing on first-year students on Admission Day. Structured findings into an **information architecture** to define core features.
3. *Design:* **Low-fidelity wireframes** for a "search-first" navigation flow. Developed **UI screens** for a connected kiosk + mobile ecosystem. Designed physical signages for top most visited spots around the campus.

Time Before Time Again - AI-Generated Exploratory Website

1. *About:* Built a **fully AI-generated website** as part of the **'AI in Design' coursework**, which mandated solely AI-driven design tools, with 2 collaborators exploring the **creative limits of prompt-driven design** under the theme 'Time Before Time.
2. *Execution:* Rapidly iterated through **60+ versions**, refining prompts and creative direction each round - sharpening **fast, iterative prototyping** skills applicable beyond AI tools.

Mission17 - Game on Sustainable Development Goals

1. *About:* Co-designed an interactive **maze game in Scratch** with **4 interconnected stages** and **17 quiz questions** (one per SDG), letting players move back and forth between stages while learning through exploration.
2. *Execution:* Used **generative AI** to create game visual assets and work out **logic/code mechanisms** in Scratch. **Playtested with 4-5 users**, gathering feedback on engagement and identified areas for future iteration.

POSITIONS OF RESPONSIBILITY

Design Domain Head - Sunshine, The Counselling Cell of IIT Hyderabad

- Redesigned the **official Sunshine website**, restructuring **information architecture** and introducing dedicated **Services, Appointment, and Resources** sections to improve **navigation and user flow.** The homepage was later updated using AI tools, building on this restructured foundation.
- Designed a **user-centered onboarding kit** (welcome kit) for **1,200+ incoming students**, iterating through structured feedback from institute counsellors to ensure clarity and accessibility for first-year users.

Hospitality Volunteer - **India HCI 2026**

- Volunteering at India HCI 2026, the 17th Indian Conference on Human-Computer Interaction, themed *"Designing for Dignity."*
- Assigned end-to-end coordination for a delegate's travel, stay, and logistics - building on prior hospitality experience at **Ayaam 2025** and **ServDes International Conference 2025**.

Graphic Design Intern - *BlackStack Automation*

- Designing **marketing assets, social media** content for startups across sectors of **environment, health** and **education.**
- **Integrate generative AI platforms** and **workflow automation** to speed up design iterations, ensuring high consistency in branding and visual elements, typography, layout, and visual storytelling.

EXTRA CURRICULAR

IIT Hyderabad women's basketball team for the past **two years:** Representing IITH at the 57th and 58th Inter IIT Sports Meet at IIT Kanpur and IIT Madras respectively.
