EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.20
SRI CHAITANYA Techno School Marathahalli Bangalore	Class XII (CBSE)	2023	96.20%
Kendriya Vidyalaya NAL Vimanapura Bangalore	Class X (CBSE)	2021	98.20%

POSITIONS OF RESPONSIBILITY

Worked as a Teaching Assistant for the course Probability and Random Variables (Jan 2025 - April 2025)

WORK EXPERIENCE

Oracle [Internship]

- Developed an end-to-end metadata-aware RAG pipeline for enterprise document processing, integrating document parsing, structured metadata extraction, schema resolution, semantic chunking, and grounded answer generation using Python and SQL.
- Engineered an Oracle Autonomous AI Database-based retrieval system with in-database ONNX embeddings, vector similarity search, metadata-catalog query planning, metadata filtering.
- Built an evaluation and optimization framework using RAGAS, benchmarking embedding, retrieval, query-augmentation, and vector-indexing strategies with transactional Oracle data ingestion.

PROJECTS

To-Do Web-application:

- Developed a personal task-management web application using Python and Django, supporting creation, editing, deletion, and status tracking of tasks.
- Implemented completed/upcoming task categorization to provide a clear and organized view of pending and finished tasks.[Link]

Grocery-Management Web-application:

- Designed and developed a Django-based e-commerce platform with separate customer and seller interfaces for managing grocery products and transactions.
- Implemented backend database logic using MySQL, Functional Dependencies, Triggers, and Stored Procedures for efficient data management. [Link]

Bayesian Genomic Modeling for Phenotype Prediction :

- Developed an R package for Bayesian inference and parameter estimation to model genetic effects and characterize polygenicity from high-dimensional genomic data.

Mentalmanip NLP:

- Developed a multi-label NLP classification pipeline to detect 11 mental manipulation techniques using sentence-transformer embeddings and supervised ML models.
- Evaluated SVM, Logistic Regression, Random Forest, KNN, Boosting, Naive Bayes, and MLP, including heterogeneous ensemble approaches for classification. [Link]

SKILLS

- Programming Languages: C, Python, R, MySql

- Frameworks: Django

RELEVANT COURSES

- **Artificial Intelligence:** Introduction to Modern AI, Artificial Intelligence, Programming for AI, Foundations of Machine Learning, Convex optimization, Computer Vision, Natural Language Processing, Robotics, Optimization -2, Deep Learning, Reinforcement Learning
- **Computer Science:** Discrete mathematics for computer science, Introduction to Programming, Computer Architecture, Data Structures & Applications, DBMS-1, DBMS-II, OS-1, Compilers-I, Algorithms
- **Math:** Calculus-I, Calculus-II, Series of Functions, Differential Equations, Vector Calculus, Probability and Random Variables, Introduction to Metric Spaces, Matrix Theory, Applied Statistics, Bayesian Statistics
- **Other:** Linear Systems & Signal Processing, Control Systems

EXTRACURRICULAR

- Completed the Junior Examination in Carnatic Vocal Music conducted by the Karnataka Board in 2019, and passed with First Class, securing 90.5%.

- **Volunteer, National Service Scheme (NSS) :** Helped teach children, took part in Swachh Bharat cleanliness drives and community service activities. **(***August 2023 - Present* **)**
