EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	9.01
Delhi Public School, Noida	Class XII (CBSE)	2023	97.60%
Delhi Public School, Noida	Class X (CBSE)	2021	98.60%

WORK EXPERIENCE

Microsoft | Software Engineering Intern

Incident Automation -- Guardian AI, M365 Substrate Platform

- Developed **SmartTSG diagnostic notebooks** on Microsoft's Guardian AI platform to automate root-cause analysis(RCA) for M365/Substrate incidents, reducing mean time to investigation by **35%.**
- Built **automated incident triage pipelines** by configuring alert-matching rules and automation artifacts to trigger Sev 2+ IcM workflows, cutting on-call engineer manual effort by **~40%** and enabling faster mean-time-to-resolution across live production incidents.
- Integrated **Kusto query analytics, MDM metrics, and Topology Service connectors** across 20+ incident patterns to generate actionable diagnostic reports posted directly to IcM incidents.

AI Test Automation - Copilot + Playwright

- Built **end-to-end UI test suites using Playwright**, automating 100+ regression test cases across critical user workflows for web application validation
- Designed and implemented a **Copilot skill with agentic workflow orchestration**, combining structured workflow definitions and deterministic automation scripts to enable reliable LLM-assisted test execution at scale
- Engineered **guardrails and step-adherence constraints** within the Copilot skill to prevent hallucination-induced step skipping, enforcing deterministic testing workflows and ensuring consistent, auditable test runs

SCHOLASTIC ACHIEVEMENTS

Qualified **KVPY-SA 2021** (National Science Fellowship, ~1% selection rate)

Qualified **NTSE Stage-II** and achieved **State-level recognition in NTSE Stage-I**

Achieved **International Rank 1** in National Cyber Olympiad (NCO) held by SOF

Achieved **All India Rank 1** in Unified Cyber Olympiad (UCO) held by Unified Council

Specialist @Codeforces (Max: 1520) - Username: redwatermelon

Solved **1000+** problems on LeetCode, rated 1500 - Username: fenwick_tree30

POSITIONS OF RESPONSIBILITY

Internship Coordinator at Office of Career Services

- Spearheaded end-to-end coordination of the campus internship process by **pitching to companies** and **mentoring students,** ensuring smooth recruiter onboarding and candidate preparedness.

Frontend Developer at Media Council

- Developed the frontend of the official Gymkhana website focusing on responsive design and user experience to showcase student bodies, events, and initiatives.

Web Manager at E-Cell (Entrepreneurship Cell)

- Led the development of the E-Summit website, collaborating with cross-functional teams to design, build, and deploy

a high-traffic platform, enhancing event outreach and user engagement.

SKILLS

- **Languages:** C, C++, Python*, JavaScript, HTML, CSS, MATLAB
- **Frameworks:** ReactJS, NodeJS, ExpressJS, NextJS, Tailwind CSS, Material UI
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Utilities:** Git, Latex, Github, Docker, VSCode

RELEVANT COURSES

Computer Science & Electrical: Introduction to Programming, Basic Electrical Engineering, Database Management System

Mathematics: Probability, Statistics, Complex Variables, Transform Techniques, Differential Equations, Linear Algebra, Calculus-I, Calculus-II

Core: Solid Mechanics, Fluid Mechanics, Thermodynamics, Physical Metallurgy, Kinematics and Dynamics of Machine, Heat and Mass Transfer

Lab: Solid Mechanics Lab, Fluid Mechanics Lab, Physics lab, Automation Lab, Digital Fabrication

PROJECTS

Welth- AI Finance Platform

- Built a **full-stack AI-powered** finance platform with real-time insights, **secure authentication**, and a responsive UI.
- Integrated **Supabase** with Prisma for seamless database management and **Inngest** for background job orchestration.
- Leveraged **ArcJet** for **AI workflows** and used Shadcn UI with Tailwind CSS for clean, accessible design components.

Parallel File Encryptor/Decryptor

- Designed a high-performance command-line tool in **C++** for **parallel** encryption and decryption using **multiple CPU cores.**
- Utilized **fork system calls** and **semaphores** for process synchronization, supporting configurable block sizes and worker counts.
- Offered flexibility through user-defined parameters for tuning performance across **varying file sizes** and system capabilities.

StudyNotion - EdTech Platform

- Built a comprehensive learning platform where **instructors** can create courses and upload content, while **students** can browse, purchase, and access **enrolled courses**.
- Implemented end-to-end payment flow using **Razorpay**, including order creation, payment verification, and post-payment access control.
- Crafted a **responsive UI** using Tailwind CSS and utilized **MongoDB** to manage user data, course content, and enrollment records.

ECell Website 2024-2025

- Contributed to the development of both the **main E-Cell website** and the **E-Summit event** platform, highlighting initiatives, events, and registration workflows.
- Integrated **secure payment** handling for E-Summit registrations using **Stripe,** ensuring smooth and reliable transactions.
- Built responsive, animated UI components and deployed both platforms via **Vercel** with fast load times and **cross-device optimization**.

EXTRACURRICULAR

- Volunteered **100+** hours as part of the **National Service Scheme (NSS)**, engaging in various community development activities
- Participated in the **Clean India Drive**, promoting environmental awareness and cleanliness through hands-on involvement
