EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.05
Delhi Public School Jodhpur	Class XII (CBSE)	2022	92.60%
Delhi Public School Jodhpur	Class X (CBSE)	2020	88.00%

WORK EXPERIENCE

Business Analyst Intern | *Licious*

- Performed advanced **exploratory data analysis (EDA)** and **applied statistical methods** (hypothesis testing, trend analysis) to derive actionable insights.

1. **Handling Fee A/B Test** - Ran a diff-in-diff analysis on a fee hike; found positive **AOV uplift (37.7-42.6)** and net **revenue uplift (+0.8-2.5%)** despite a modest conversion dip, leading the team to extend the experiment for further validation before a rollout call.

- Designed and developed multiple **business-critical dashboards** from scratch using SQL, Python, and Tableau, covering **130+ operating hubs**, and established an **analytical optimization framework** to drive actionable insights and improve decision-making.

1. **Express-Led Revenue Loss dashboard** - Estimates **revenue loss** from customers not receiving the **target Express promise**, using metrics like uptime, impressions, conversion, AOV, etc. Tracked **weekly** at the **KML level (agg to City)** using **80th percentile** calculation to identify and prioritize **high-loss hubs.**
2. **Real-Time Metrics Dashboard** - Tracked **12 key metrics** across **City × Hour**, including Total/Cluster/OD/Non-cluster OD Orders, Order Attainment, Overall/Cluster/OD SLA, OD Share, Rider GAPS, Rider hourly logins, and OPH per rider. Enabled same-hour staffing corrections and accountability across in-house and third-party channels.
3. **O1-O5+ customer progression dashboard** - Tracks progression across **5 value cohorts (O1-O5+)** at **7/14/28/56/91-day intervals**, along with **Traffic%** and **ATC%** at each base. Identifies drop-offs and drives hypothesis-led retention experiments, lifting **O1O2 conversion from 17% to 24% (avg. trend)** over the internship.

- Collaborated with **cross-functional stakeholders** to identify analytical requirements, interpret insights, and translate data findings into actionable business strategies.

- Leveraged Python for automating workflows , end-to-end EDA and feature engineering

Manager, Restaurant Operations and Marketing | *The Chicks & Kabs*

- Oversaw **end-to-end operational workflows** and **user experience**, ensuring smooth service delivery and process scalability.
- Leveraged customer feedback and data analytics to enhance user satisfaction, increasing platform rating from **3.5 to 4.0** and improving **monthly conversions by 15%.**
- Conceptualized and launched a new product line, **"Khane Mai Kya Hai,"** validating product-market fit through digital campaigns that drove a **25% increase** in new user acquisition.

PROJECTS

Tableau-Google Sheets Reverse-ETL Automation Pipeline | *Licious*

- **Automated Tableau-to-Google Sheets data pipelines** using Google Apps Script, Tableau VDS, and AI tools such as **Claude and ChatGPT**, enabling scheduled daily refreshes across multiple business data sources while eliminating manual data refreshes.
- **Optimized large-scale data extraction and refresh reliability** with AI-assisted development using **Claude and ChatGPT**, implementing selective column/date filtering, hourly batching, checkpoint/resume workflows, automated continuation triggers, and exponential-backoff retries to overcome Tableau's **50 MB response limit** and Apps Script's **6-minute execution limit**.

Campus Connect (CC)

- Applied Lean Startup methodology to identify the riskiest testable assumptions in a bounded-community events platform -- organic hosting behavior, whether three product pillars (content, events, matching) belong in one app, and whether event-anchored matching converts to real meetups -- before any build decisions.
- Structured a base-plus-premium model: free event hosting within a single verified domain community (campus, company office, gated society), with a paid subscription unlocking expanded matchmaking features.

Zeolite recommendation ML model for methanol to DME

- Developing an **ML pipeline** to recommend **zeolite catalysts** for the **methanol-to-dimethyl-ether (DME)** reaction, curating a literature-derived database of catalyst structural/physicochemical descriptors and reaction conditions.
- Building and evaluating **tree-based** ensemble models to classify **conversion and regress** product selectivity for **methanol-to-DME zeolite catalysts**, with the goal of extracting **interpretable decision rules** linking catalyst descriptors to performance.

POSITIONS OF RESPONSIBILITY

Head, Sponsorship | *Inter-IIT Sports Meet 2025*

- Drove sponsorship acquisition toward a **60+ Lakh** target across **100+ national partners**, building and managing **15+ Lakh** in early-stage pipelines through strategic B2B outreach and stakeholder engagement; coordinated **multi-city sponsorship operations and partner deliverables** for Inter IIT Sports Meet 2025.

Coordinator, Partnerships | *TEDxIITHyderabad*

- Reached **40+ companies** through B2B outreach and negotiations; brought **Mr. Sanmati Pandey, CEO of Growfitter**, onboard as a **TEDx speaker**, expanding corporate engagement and event visibility.

SKILLS

- **Product & Analytical Tools:** Python, SQL (PostgreSQL, MySQL), Power BI, Tableau Dashboards, Tableau Flows, Jupyter Notebooks, Microsoft Excel / Google Sheets, Word, Airflow (DAG), Metabase query & Dashboard, Appscript automations
- **Management:** Product Requirement Documents (PRDs), User Stories, User Journey Mapping, A/B Testing, Optimizational Frameworks, Competitive & Market Research, Supply-Chain Operational Metrics tracking,
- **Business & Communication:** Stakeholder Management, Cross-Functional Collaboration, Go-To-Market (GTM) Strategy, Customer Feedback Analysis, User Engagement, Post experimental analysis
