EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	7.71
SRI CHAITANYA VIDYA NIKETAN VISAKHAPATNAM,AP	Class XII (CBSE)	2022	85.80%
SRI CHAITANYA EM SCHOOL	Class X ((Board of Secondary Education, Andhra Pradesh (BSEAP))	2020	100.00%

POSITIONS OF RESPONSIBILITY

Undergraduate Representative I, Student Gymkhana

- Elected as the primary representative for **1,000+ undergraduate students**, addressing academic, welfare, and student-related concerns.
- **Chaired the Class Representative Council**, coordinating representatives across departments and consolidating student feedback for policy discussions.
- Led end-to-end planning and execution of **UG Fresher and Farewell events**, managing **12L+ combined budgets** across logistics, coordination, and event operations.
- Collaborated with **PG Representatives and General Secretaries** to organize UG-PG initiatives, fostering interdisciplinary engagement and student participation.
- Maintained and managed **UG batch records and student data** to support communication, event planning, and administrative decision-making.

Hospitality Coordinator, Diesta

- Coordinated **venue setup, logistics, and operational readiness** for competitions, practice spaces, and viewing areas.
- Managed **on-ground participant support**, venue navigation, and real-time coordination to ensure smooth event operations.
- Coordinated procurement and upkeep of **sports, technical, and first-aid equipment** across event venues.

SKILLS

Programming: Python, C++, SQL, JavaScript

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Machine Learning: Scikit-learn, PyTorch, TensorFlow, Deep Learning, NLP

Generative AI: Hugging Face, Transformers, LLMs, Embeddings, RAG

Vector Database: FAISS

Data Engineering: PySpark, Pandas, Microsoft Fabric, Delta Lake, OneLake

Databases: PostgreSQL, PostGIS

Web & Tools: FastAPI, HTML, CSS, Git, GitHub, Docker, Jira, VS Code

Analytics: Power B

RELEVANT COURSES

Artificial Intelligence: Introduction to Artificial Intelligence, Machine Learning in Chemistry

Computer Science: Introduction to Programming in C

Mathematics: Calculus I, Calculus II, Elementary Linear Algebra, Introduction to Probability

PROJECTS

Mental Health Score Prediction | Python, Scikit-learn, Random Forest, FastAPI

- Built an **end-to-end machine learning regression application** to predict student mental-health scores (0-10) using academic, lifestyle, stress, and digital-habit features from **~5,000 records**.
- Developed a **Scikit-learn preprocessing pipeline** using ColumnTransformer, StandardScaler, OneHotEncoder, and OrdinalEncoder; trained a **Random Forest Regressor** achieving **0.878 test R^2 and 0.347 MAE**.
- Performed **cross-validation and hyperparameter tuning with RandomizedSearchCV**, serialized the model with **Joblib**, and deployed predictions through a **FastAPI REST API** with an interactive web interface.

Sentiment Analysis | Python, NLP, Scikit-learn, Streamlit

- Built a **machine learning-based sentiment analysis application** to classify text input using an NLP preprocessing and classification pipeline.
- Implemented **text preprocessing, feature extraction, model training, and evaluation** using Python and Scikit-learn, with the trained model and vectorizer serialized using Joblib.
- Developed an interactive **Streamlit web application** for real-time sentiment prediction and integrated the trained ML model for inference.

E-Commerce Funnel, Retention & RFM Analytics | SQL, Python, Pandas, Power BI, DAX

- Analyzed **6,000-user e-commerce journeys** using SQL and Python to evaluate funnel conversion, acquisition-channel performance, device behavior, and customer retention.
- Performed **cohort retention and RFM customer segmentation** to analyze repeat purchasing behavior and revenue contribution across customer segments.
- Built an **interactive analytics dashboard** with KPI tracking, funnel visualization, retention analysis, customer segmentation, filters, and Power BI-ready datasets.

PROFESSIONAL EXPERIENCE

AI Intern | ORBCOMM Technologies India Pvt. Ltd. |

- Developed an AI-based geofence matching system using **Sentence Transformers and FAISS** for embedding-based semantic similarity, with **PostGIS** for spatial validation.
- Implemented **semantic and fuzzy matching using Sentence Transformers and RapidFuzz** for entity/category normalization and maritime facility matching.
- Developed container **dwell-time analytics** using movement and telemetry data to calculate residence time at origin and destination locations.
- Built **PySpark data pipelines and Gold tables in Microsoft Fabric** for downstream logistics analytics.
- Performed geospatial and telemetry analysis using **PostGIS, Shapely, and Folium**, contributing to WIMC and container-tracking workflows.
