EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	7.98
S.S. ACADEMY AKANGARSARAI, NALANDA	Class XII (BIHAR SCHOOL EXAMINATION BOARD)	2022	88.40%
S.S. ACADEMY EKANGARSARAI, NALANDA	Class X (BIHAR SCHOOL EXAMINATION BOARD)	2020	85.80%

WORK EXPERIENCE

360 Technology Groups June 2026 - July 2026

AI Developer Intern Remote

- Spearheaded 0-to-1 product execution for a CDC-recognized Diabetes Prevention Platform across a React Native mobile app, a Next.js Dietitian Command Center, and a HIPAA-aligned FastAPI and PostgreSQL backend utilizing Redis and Celery for asynchronous processing.
- Designed an insurance-native billing engine that verifies CPT 0403T eligibility against a live clearinghouse and automatically stages CMS G-code claims upon clinical milestones -- reducing out-of-pocket cost to $0 for insured patients, with a RevenueCat self-pay fallback for uninsured users.
- Shipped a human-in-the-loop AI coaching system with persistent clinical memory, utilizing SSE-streaming Gemini and GPT-4o for 24/7 chat and meal photo analysis while enforcing strictly asynchronous dietitian reviews to ensure clinical safety at every touchpoint.
- Launched a Next.js Dietitian Command Center to consolidate provider workflows, featuring patient roster management, Celery-driven AI pre-visit summaries, Zoom scheduling, real-time Socket.IO messaging with read receipts, and CMS NPPES registry NPI credential verification.
- Architected a multi-modal food logging experience integrating GPT-4o Vision, Nutritionix NLP, and Apple HealthKit/Terra API wearable sync, engineering tiered CDC-calibrated badges and phantom streak protection mechanics to maximize 12-month retention.

PROJECTS

BookSense | Python, FastAPI, HuggingFace, React, ChromaDB, Docker

- Engineered an AI semantic search engine using HuggingFace (MiniLM-L6-v2) to encode natural language queries into 384-dimensional vector embeddings for contextual, mood-aware book discovery.
- Built a 7-axis emotion classification pipeline using DistilRoBERTa to analyze book synopses; implemented an in-memory embedding cache to eliminate redundant model inference and optimize dual-model throughput.
- Integrated ChromaDB for cosine similarity vector search and orchestrated an automated ETL pipeline that dynamically expands the searchable corpus via live Google Books API ingestion.
- Designed a production-ready, Docker-containerized system with a decoupled Python/FastAPI backend and a React 19 / Vite frontend, secured with environment-based config management and CORS endpoints.

Auto-Agentic RAG System | Python, FastAPI, LangGraph, ChromaDB, React, Tailwind, Docker

- Engineered a production-ready Agentic RAG system using LangGraph and Google Gemini 2.5 Flash, achieving dynamic query routing, semantic relevance grading, and automatic fallback to live web search via Serper.dev.
- Designed a scalable document ingestion pipeline with Google Drive OAuth 2.0; leveraged FastAPI BackgroundTasks to process uploads asynchronously and eliminate HTTP timeouts during large-scale ingestion.
- Implemented per-session vector store isolation using ChromaDB for true multi-user support; built a hallucination-detection node to validate that generated answers are strictly grounded in retrieved context.
- Deployed a cloud-native architecture using Docker, Hugging Face Spaces, and Vercel (React 19 / Vite); configured environment-based CORS, API key authentication, and CI/CD-compatible deployment pipelines.

- Architected a 5-node LangGraph reasoning pipeline with mathematical confidence thresholds and LLM-based graders, retrieving up to 25 context chunks per query to maximize accuracy across multi-document corpora.

Zomato Dataset Analysis Project | SQL Server, T-SQL, Data Profiling, Feature Engineering

- Profiled and transformed a large-scale restaurant dataset using SQL Server, successfully identifying and resolving structural inconsistencies, missing values, and duplicate records.
- Engineered optimized T-SQL queries utilizing multi-table joins, window functions, and complex aggregations to extract actionable business insights from relational tables.
- Enriched the foundational data model by merging datasets and generating new categorical features, including regional mappings and rating tiers, to expand analytical capabilities.
- Evaluated core metrics such as user votes, aggregated ratings, cuisine popularity, and pricing distributions to map consumer trends, authoring comprehensive documentation to ensure project reproducibility.

SCHOLASTIC ACHIEVEMENTS

School Topper, Class XII Board Examinations, S.S. Academy , 2022

SKILLS

Programming Languages: C++,PYTHON,SQL,HTML,CSS,JavaScript,Scikit-Learn

Machine Learning Libraries: NumPy , Pandas, Matplotlib, Seaborn

Tools & Framework: VS Code , Pgadmin4 , Jupyter Notebook , Github

Soft Skill: Effective Communication , Problem Solving, Team Collaboration , Adaptability , Creativity , Attention to Detail

Core Fundamentals: DSA , Database Management Systems (DBMS) , Object-Oriented Programming(OOPS),RAG

RELEVANT COURSES

R and Python , Intro to AI & ML , Probability and Random Variables , Introduction to Programming , Calculus , Linear Algebra , Diffrential Equation , Communication Skill, Big Data Biology and Biological Databases , Biostatistics , Machine Learning for Bioinformatics, Data Science Analysis, Artificial Intelligence in Drug Discory

POSITION OF RESPONSIBILITIES

Assistant Manager of Ideation Domain in E-Cell

Events and Competition Manager , E-Cell

UG Mentor , Sunshine

Editorial Co-Ordinator for Media Council , IITH Gymkhana

EXTRACURRICULAR ACTIVITIES

National Sports Organization (Hockey) : Selected for Hockey Team .

Selected to represent IITH in Hockey at the 2025 Inter IIT Sports Meet.
