PROJECTS

FlashStock - High-Concurrency Order & Inventory Engine

- Engineered a **concurrency-safe order processing backend** with idempotent APIs and atomic inventory updates to prevent duplicate orders, race conditions and overselling.
- Integrated **Redis caching and asynchronous order processing** to reduce repeated database operations and efficiently handle high-volume concurrent requests.
- Performed **load testing and performance analysis**, measuring throughput and **P95/P99 latency** under concurrent traffic to identify and optimize system bottlenecks.

CampusConnect -- Event & Volunteer Management Platform

- Designed and developed a **full-stack event management platform** supporting event creation, volunteer registration, role-based task allocation and QR-based attendance check-in.
- Implemented **real-time announcements, live dashboards and attendance tracking** to provide organizers with up-to-date event and volunteer activity.
- Built structured **role-based workflows and management features** to streamline coordination between event organizers, volunteers and participants.

SyncDocs - Real-Time Collaborative Document Editor

- Developed a collaborative editor with **real-time multi-user editing, live presence, document sharing and role-based access control**.
- Implemented **concurrent-edit synchronization and version history** over WebSockets using conflict-resolution techniques to maintain consistent document state.
