EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	7.17
Navyug Convent, Delhi	Class XII (CBSE)	2022	87.00%
Nazareth Academy	Class X (CBSE)	2020	91.00%

WORK EXPERIENCE

Senior Product Analyst Intern | Media.Net

- **Pixel & Consent Intelligence Tool (PCIT):** Spearheaded an autonomous simulation engine to model multi-branch user journeys, dynamic DOM interactions, and consent states across **400+ advertisers and 600+ landing pages daily**; eliminated **30-50 team-hrs/week** of manual validation, achieving **85% faster audit process.**
- **User Journey Platform:** Architected a behavioral analytics platform consolidating fragmented clickstreams by stitching **15M+ daily adclicks across 100+ advertisers via unique Click IDs**; resolved a **22% event drop-off discrepancy** between ad clicks and verified landing page visits using Sankey-based user journey mapping.
- Formulated a **journey-tiering clustering algorithm** to compress **1M+ complex user paths** into dominant behavioral cohorts; engineered a **"Backtrack Toggle"** for reverse-funnel mapping and better visibility.

Strategy & Product Lead | Picapool Pvt Ltd

- **Spearheaded cross-geography expansion and growth strategy** across 5+ premier campuses (IIT Hyderabad, DU, BITS Pilani, IIIT Delhi, LPU) to scale active users to **10,000+**; deployed standardized launch playbooks and ambassador governance frameworks that compressed Blended CAC by **35%**.
- **Engineered behavioral SQL data models and funnel analytics** to track pooling liquidity, drop-offs, and cohort churn; ran multivariate A/B tests on onboarding loops to drive a **22% lift in D30 retention** while activating **200+ strategic partnerships** and synthesizing unit economics into founder fundraising roadmaps.

POSITIONS OF RESPONSIBILITY

Overall Head | Office Of Career Services

- Currently directing end-to-end placement and internship operations for **2,500+ students** & **300+ organizations**, leading a **400-member team** while strengthening outreach and execution across the recruitment lifecycle.
- Driving enhancements to the **OCS Portal** to improve workflow visibility and streamline the experience for students, recruiters, staff, and coordinators; organized **Japan Career Day** with **20+ Japanese firms** and expanded **Career Connect** nearly **6×**, from **7 to 40 participating companies**.

Head of Mobility & Transit Infrastructure | Inter IIT Sports Meet '25

- Owned end-to-end mobility infrastructure for **2,300+ participants**, managing a **4 million budget** across tendering, vendor evaluation, commercial negotiations, and service delivery.
- Designed **24/7 route plans**, capacity allocation, and contingency protocols; managed a **30-member team** and developed a real-time mobility-tracking solution to improve coordination and issue resolution.

Head of Management and Operational Execution | Tinkerers' Lab

- **Governed cross-functional operations, budget allocation, and** institutionalizing OKR frameworks and sprint roadmaps to synchronize project delivery with institute leadership goals.
- **Spearheaded operational execution and stakeholder engagement for flagship initiatives**, delivering *Thrust 2026* (3,000+ footfall) and scaling multi-city outreach funnels across 15+ cities to drive 10,000+ student engagements.

PROJECTS

FleetGuard : Delivery Partner Telemetry & Churn Risk Engine

- Built a risk detection prototype using **Python, SQL (PostgreSQL), Scikit-Learn, and XGBoost** across **25,000+ driver sessions**, engineering 14 behavioral and GPS telemetry features flagging an **8.5% incidence of artificial delivery delays** and dwell-time anomalies during peak windows.
- Optimized model classification thresholds using custom cost-utility matrix & **SHAP explainability**, reducing false-positive driver flags by **28%** and cutting dispute review from **24 hours to under 2 hours** in a **Streamlit** console.

MarginShield: Subscription Funnel & Unit Economics Analytics

- A marketplace analytics suite using **SQL, Advanced Excel, and Power BI** across **50,000+ user records & 450K+ transactions,** to uncover **15% order-frequency** lift offset by an **8% take-rate dilution** from free delivery subsidies.
- Identified **199 MOV threshold protected** unit contribution margins without increasing 30-day subscriber drop-off.

FoodPulse: Demand Forecasting & Menu Intelligence

- Architected predictive demand pipeline using **Python, SQL, and Cross-Correlation** across external food discourse and search volumes, proving external intent signals lead on-platform search surges **by 14 to 21 days**
- Formulated a **Hyperlocal Supply Opportunity Index (SOI)** balancing search momentum against 3km competitor SKU density, deploying an interactive Streamlit/Plotly merchant **cockpit to guide high-margin** menu expansion.

SKILLS

Technical & Analysis: SQL, Python (Pandas, NumPy), Excel (Advanced), Power BI, Tableau, Database Design (Schema Architecture, PostgreSQL), REST APIs, Behavioral Telemetry & Clickstream Analytics, Data Visualization, Figma

Product & Metrics: User Journey Mapping, Funnel & Drop-off Analysis, A/B Testing, Experimentation, Hypothesis Testing, North Star & Guardrail Metrics, Unit Economics (CAC, LTV, AOV), PRD Authorship, Stakeholder Alignment, Jira

EXTRACURRICULAR

Winner at Pitch Perfect (SIBM Pune), Startup Bootcamp (IIT Madras), and Disrupt - UDGAM Fest (IIT Guwahati)

Runner-Up at Pitch Perfect (IIM Bodhgaya & IIM Lucknow) and Entrepreneurship Conclave (BITS Pilani)
