EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	7.55
SRI CHAITANYA CO-ED JUNIOR COLLEGE SRI CHAKRA BHAVAN, VIJAYAWADA	Class XII (Board of intermediate Education Andhra Pradesh)	2023	97.30%
SRI CHAITANYA TECHNO SCHOOL MORAMPUDI, EAST GODAVARI DISTRICT	Class X (Board of Secondary Education Andhra Pradesh)	2021	100.00%

WORK EXPERIENCE

Web Development Intern | Pratinik Infotech

- Developed a responsive **event management platform** using React and Node.js for event discovery and registration.
- Implemented **event booking and user registration** features with database integration for managing event data.
- Built an **admin panel** to manage events and registrations, streamlining administrative workflows.

AI Trainee | Deccan AI

- Evaluated **AI-generated responses** using web contexts to assess instruction following, relevance, factual accuracy, and groundedness.
- Applied structured **evaluation rubrics** to identify response quality issues and support improvement of AI model outputs.

SKILLS

Languages: C++, Python, SQL

Backend & Web: Node.js, Express.js, REST APIs, React.js

Databases & Caching: MongoDB, Redis, SQLite

Systems & Concepts: Data Structures & Algorithms, OOP

Tools & Practices: Git, GitHub, Docker, Postman, Unit Testing, API Testing

PROJECTS

IITH Project Marketplace

- Built a **project collaboration platform** using React, TypeScript, Node.js, Express, and MongoDB for IITH students to discover and join projects.
- Implemented **JWT authentication, role-based access, project creation, search, and application workflows** for secure collaboration.
- Designed a **RESTful backend with MongoDB persistence** and protected routes to support scalable project and user management.

Distributed Rate Limiter

- Built a **distributed API rate limiter** using the Token Bucket algorithm to control request throughput across multiple application instances.
- Implemented **Redis Lua scripts** for atomic token refill and consumption, preventing race conditions under concurrent requests.
- Integrated **Express middleware** with TTL-based cleanup, failure handling, automated tests, and load testing for reliable traffic control.

Scalable URL Shortener

- Built a **scalable URL shortener** using Base62-encoded IDs with modular storage and caching for high-frequency redirects.
- Designed a **Redis cache-aside layer** and asynchronous batched analytics queue to reduce database load on the redirect hot path.
- Added **unit/E2E tests, Docker deployment, and load testing**, achieving ~**1,480 requests/sec** in a local benchmark.

AI Code Review Assistant

- Built an **AI-powered code review assistant** to analyze source code for bugs, security issues, and maintainability.
- Integrated **LLM-based code analysis and prompt engineering** to generate structured, actionable review feedback.
- Developed a lightweight **web interface and API workflow** for automated code submission and review generation.

POSITIONS OF RESPONSIBILITY

Overall Coordinator | Milan Fest 2025-26, IIT Hyderabad

- Led a **99-member student team** across 9 domains to plan and execute IITH's annual inter-hostel championship.
- Coordinated cross-functional teams across **events, hospitality, PR, production, sponsorship, web, creatives, and finance**.
- Managed **timelines, resource allocation, and inter-team dependencies** to ensure smooth execution of large-scale events.
- Made **time-critical decisions under pressure**, resolving operational issues and coordinating stakeholders during event execution.
