EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.67
sri chaitanya junior collage	Class XII (Board of Intermediate Education Andhra pradesh,India)	2024	96.90%
Sri Chaitanya English Medium school	Class X (Board of Secondary Education Andhra pradesh,India)	2022	96.33%

SKILLS

Programming Languages: C, C++, Java, Python, SQL, JavaScript

Web Technologies: HTML, CSS

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Architecture, Database Management Systems, Theory of Computation

Tools: Git, Linux/Unix, Shell Scripting, Bash, Terminal/Command Line, VS Code, Maven.

PROJECTS

1.Arbitrary Precision Arithmetic Library (Java)

Technologies: Java, Object-Oriented Programming

Developed a Java library to perform arbitrary-precision integer and floating-point arithmetic beyond the limitations of native data types. Designed custom AInteger and AFloat classes without relying on Java's built-in BigInteger or BigDecimal libraries. Implemented parsing, comparison, addition, subtraction, multiplication, and division algorithms along with a command-line interface for arithmetic operations. Emphasized modular design, object-oriented principles, and algorithmic correctness.

git hub : https://github.com/chandu836/project.git

2.BigMul Hardware Accelerator in an In-House RISC-V Simulator

Technologies: C++, RISC-V ISA, Computer Architecture

Designed and implemented a custom BigMul hardware accelerator in an in-house RISC-V simulator to accelerate 4096-bit integer multiplication. Extended the RISC-V ISA with a custom instruction and integrated a dedicated execution unit with DMA-assisted memory transfers to minimize CPU intervention during large-integer computations. Modified the simulator's execution pipeline and memory subsystem, validated correctness using custom test programs, and evaluated the performance benefits over software-based multiplication.

github : https://github.com/chandu836/riscv-simulator-2.git

3.Custom Instruction Support for an In-House RISC-V Simulator

Technologies: C++, RISC-V ISA, Computer Architecture

Extended an in-house RISC-V simulator by implementing support for custom ISA instructions. Modified instruction decoding, execution logic, and simulator components to recognize and execute newly introduced instructions while maintaining compatibility with the existing instruction set. Developed assembly-level test programs to validate functionality and gained practical experience in ISA extensions, instruction decoding, and processor simulation

git hub : https://github.com/chandu836/riscv-simulator-2.git

RELEVANT COURSES

Introduction to Computing, Introduction to Programming, Discrete Mathematics for Computer Science, Software Development Fundamentals, Data Structures, Algorithms, Theory of Computation, Operating Systems, Computer Architecture, Database Management Systems, Compilers, Probability & Random Variables, Introduction to Statistics, Linear Algebra, Calculus I & II.

POSITIONS OF RESPONSIBILITY

Coordinator - PR Domain, Media Council, IIT Hyderabad(present)

- Managing public relations, social media outreach, and promotion of campus events.
- Coordinating with student clubs and teams to improve event visibility and engagement

Coordinator - Event Management Team, IKS Club, IIT Hyderabad

- Planned and executed club events, coordinating logistics and volunteers.
- Ensured smooth on-ground event execution.

SCHOLASTIC ACHIEVEMENTS

Secured admission to IIT Hyderabad through the national engineering admissions process.

LPU Scholarship Examination - Selected among the Top 500 candidates; awarded a 1,00,000 Merit Scholarship

Secured 3rd rank in the 1st Internship & Placement Practice Contest conducted by the Infero Club, IIT Hyderabad.

Secured 7th rank in the 2nd Internship & Placement Practice Contest conducted by the Infero Club, IIT Hyderabad.

EXTRACURRICULAR

Regularly practice Data Structures & Algorithms on LeetCode and the CSES Problem Set.

Participate in Codeforces programming contests to strengthen competitive programming and problem-solving skills.

Participate in dance performances during cultural events and institute festivals at IIT Hyderabad.
