EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.11
Army Public School, Bhopal	Class XII (CBSE)	2023	93.40%
Army Public School, Bhopal	Class X (CBSE)	2021	97.20%

SCHOLASTIC ACHIEVEMENTS

Bronze Medalist in the **National Science Olympiad** during middle school. Actively participated in inter-school, college, and inter-departmental sports competitions, including **Bioblasts**, winning multiple medals.

POSITIONS OF RESPONSIBILITY

Head of Sponsorship Department | Milan, IIT Hyderabad (2026 - Present)

Leading sponsorship strategy, corporate outreach, and partnership management for IIT Hyderabad's flagship inter-hostel sports fest.Playing a key role in the planning, management, and cross-functional execution of the festival.

Coordinator | Hospitality Department, Milan (2025 - 2026)

Coordinated hospitality, logistics, and on-ground operations for participants and guests during the festival. Collaborated with organizing teams to ensure smooth event execution.

Coordinator | International Relations Cell, IIT Hyderabad (2025 - 2026)

Served as the primary point of contact for international students, particularly Japanese exchange students, facilitating smooth communication and addressing their concerns. Coordinated international engagement initiatives by collaborating with students, faculty, and institute stakeholders.

SKILLS

Technical Skills

Programming: C++, Python, SQL, Bash/Shell Scripting

Bioinformatics: NGS Data Analysis, Genome Analysis, Sequence Alignment, Variant Calling, Variant Filtering & Annotation, Genomic Data Processing, Hi-C Data Analysis

Bioinformatics Tools: FASTQC, BWA, SAMtools, BAM/SAM Processing, GATK, BEDTools, IGV

Computational Biology: Genomics, Molecular Biology, Microbial Growth Kinetics, Biological Data Analysis

Data Analysis & Visualization: NumPy, Pandas, Matplotlib, Statistical Analysis, Data Visualization

Developer Tools: Git, GitHub, Linux/Unix, Command Line

PROJECTS

Big Data Biology

- Implemented an **end-to-end genome analysis pipeline** to identify genetic variants from high-throughput sequencing data.
- Performed **quality control and preprocessing** of raw sequencing reads, followed by **sequence alignment/mapping** against a reference genome.
- Applied downstream processing including **SAM/BAM handling, sorting, indexing, duplicate/read-quality processing, and variant calling** to generate candidate variants.
- Performed **variant filtering and annotation** to identify and characterize biologically relevant **SNPs and small**

indels.
- Worked with **large-scale sequencing datasets**, using command-line bioinformatics tools to automate and execute the complete analysis workflow.

Bacterial Growth Curve Analysis

- Cultured bacterial samples and monitored microbial growth through **periodic optical density (OD) measurements**.
- Generated and analyzed **bacterial growth curves**, identifying lag, exponential, stationary, and decline phases.
- Studied bacterial **growth kinetics** using experimental time-series data.

RELEVANT COURSES

Biochemistry, Big-Data Biology, Genetic Engineering, Molecular and cell biology, Microbiology, Protein structure function and diseases, Nucleic Acids and RNA Biomedicine

EXTRACURRICULAR

Represented the school in **inter-school basketball competitions,** also part of **NSO Basketball IITH**, showcasing teamwork and sportsmanship. Maintained an active involvement in **swimming, badminton, and fitness training,** demonstrating discipline, perseverence, and a commitment to personal well-being
