EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.57
tirumala	Class XII (andhra pradesh board)	2024	98.20%
sri chaitanya	Class X (andhra pradesh board)	2022	97.00%

POSITIONS OF RESPONSIBILITY

UG Mentor, Sunshine - Counselling Cell, IIT Hyderabad (2025-26)

- **Mentored** incoming students, helping them adapt to academic and campus life.Assisted students in **Resolving** their **Concerns** through peer support and coordination.
- **Facilitated communication and student engagement** by identifying concerns, coordinating with the counselling team, and promoting a supportive campus environment.

Menu Coordinator, Mess Monitoring Council, IIT Hyderabad (2025-26)

- Collaborated with the committee to design **balanced** and **student-centric mess** menus.
- **Collected and addressed student feedback** on meals and collaborated with mess staff to improve **menu planning, food quality, and overall dining experience**..

SKILLS

DATA & ANALYTICS: Excel,Exploratory Data Analysis,Statistical Analysis,Data visualization,Propability,Statistics,SQL.

PROGRAMMING: Python,Numpy,Pandas.

PROJECT MANAGEMENT: Project Planning,Requirement Analysis,Resource Planning,Recorrection of model.

TOOLS: Microsoft Excel,Power point,Power BI.

Business: Requirements Analysis, Problem Solving, Data-Driven Decision Making, Report Writing

- Familiarity with AI tools and LLM-based platforms, including ChatGPT, for research and productivity enhancement.

SOFT SKILLS

- Quick learner with the ability to adapt to new technologies, tools, and dynamic work environment.Problem solving Skills
- Curiosity and Inquisitive thinking. An individual who is always passionate about learning new technologies.
- Self motivated disciplined person capable of working independently as well as collaboratively in team environments.

PROJECTS AND EXPERIENCE

PROJECT4 :Customer Churn Prediction Model

- Developed a **Machine learning model** to predict customer churn using demographic, account, and service-related features.Performed **data cleaning using pandas**, exploratory data analysis, and categorical feature encoding.
- Built and evaluated **Logistic Regression** and **Random Forest Classification** models using **Scikit-learn**.
- Evaluated model performance using **Accuracy,Precision,F1-Score** and **Confusion Matrix.**
- Analyzed feature importance to identify key factors influencing customer churn and support data-driven strategies.

PROJECT3:Sales Forecasting And Bussiness Analytics(Case S tudy)

- Analyzed **36 months of historical sales data** using **Python, Pandas, NumPy, and SQL** to identify **sales trends and seasonal patterns**.
- Performed **Data Cleaning, EDA, and Data Visualization** using **Matplotlib** to understand sales behavior and prepare data for modeling.
- Applied **Feature Engineering** by extracting **Month, Year, Time Index, Sine, and Cosine features** to capture **time-based seasonality**.
- Developed a **Linear Regression Machine Learning model** using **Scikit-learn** and implemented **time-based Train/Test Splitting** for model validation.
- Evaluated model performance using **MAE (Mean Absolute Error)** and **RMSE (Root Mean Squared Error)** to measure **forecasting accuracy**.
- Generated a **6-month future sales forecast**, visualized **Actual vs. Predicted Sales**, and exported results for **Power BI Dashboard** integration.

PROJECT1:Student Perfomance Analysis Using Python

- Developed a **Student Performance Analysis** project using **Python, Pandas, and Matplotlib** to analyze academic performance data.
- Performed **data cleaning, feature engineering, and statistical analysis** by calculating total marks, averages, and pass/fail status.
- Identified **top-performing students** and analyzed **subject-wise performance trends** using descriptive analytics.
- Created **interactive visualizations** to compare average marks across subjects and present key insights.
- Exported the analyzed results to a CSV report, demonstrating skills in **data analysis, reporting, and visualization**.

Product Funnel & Conversion Analysis | SQL, Python, Power BI

- Used **SQL** to calculate conversion rates, revenue across user segments.
- Used **Python (Pandas, Matplotlib)** to identify funnel drop-offs and compare **device/source performance**.
- Generated **data-driven insights** to identify conversion bottlenecks and support product optimization decisions.
