## EDUCATION

| Institution | Degree / Board | Passing Year | Score / CGPA |
|---|---|---|---|
| Indian Institute of Technology Hyderabad | B.Tech | 2028 | 7.11 |
| Baluni Public School | Class XII (CBSE) | 2023 | 95.20% |
| Baluni Public School | Class X (CBSE) | 2021 | 93.00% |

## AI/PRODUCT CASE STUDY- SMART FARMING SYSTEM

**Research Intern, under Prof. Ganesh Ramakrishnan, IIT Bombay · 2nd Year**

- Identified a core gap in traditional farming -- soil and light conditions change constantly, but farmers can't monitor fields

around the clock -- and scoped a smart farming system, inspired by MIT's "**Personal Food Computer**", that automates monitoring and gives farmers remote, phone-based control over actuators (e.g., triggering irrigation or artificial lighting) without needing to be physically present. Owned the product end-to-end : defined requirements, selected the sensor stack (DHT11 temperature sensor, humidity sensor, soil moisture sensor, sunlight sensor, wind speed sensor etc),

and designed the **Raspberry Pi**-based decision logic to trigger irrigation actuators.

- Built a **Pandas**-based data pipeline to continuously log sensor readings, powering rule-based decisions across multiple

actuators -- e.g., triggering irrigation when soil moisture dropped below threshold, or activating artificial grow lights when sunlight levels were insufficient -- forming the foundation for both real-time automation and long-term pattern analysis.

- Trained **Random Forest** and **Linear Regression** models on accumulated sensor data to forecast rainfall and sunlight

trends, shifting the system from reactive watering to proactive, forecast-driven farm planning that lets farmers prepare in advance and reduce crop loss.

- Deliberately scoped the **MVP** as software-only -- validating sensing logic and prediction accuracy before committing to

hardware builds -- a cost-derisking, prioritization-under-uncertainty call typical of early-stage product work.

- Designed a **scaling roadmap** to extend the system from single-unit prototype to large agricultural fields, training models on historical agricultural department data from multiple states to account for region-specific climate patterns -- laying groundwork for distributed sensor networks and centralized cloud data aggregation across diverse microclimates.

## LEADERSHIP & EXTRACURRICULAR IMPACT

**Team Manager, Titanic Tigers -- IIT Hyderabad Institute Athletics League · 2nd Year**

- Devised a **data-driven bidding strategy** for a **budget-constrained,** IPL-style player auction -- modeling gender-weighted

scoring rules and event caps (no event limit for girls different from boys with 3 events per male) to identify undervalued players and maximize points-per-rupee.

- Secured the auction's most valuable (expensive) player through this approach and led on-ground team management (motivation, discipline, punctuality) across the competition.
- Result: **won** IIT Hyderabad's first-ever institute Athletics League.

- Represented IIT Hyderabad in Athletics at the Inter-IIT Sports Meet 2025.

**Content & Curation Coordinator -> Content Head, EML Club · 2nd-3rd Year**

- Promoted to **Head in 3rd year** after strong performance as Coordinator in 2nd year, leading end-to-end planning and execution for events featuring Padma Shri awardees and other notable personalities.
- Acted as point of contact for guest speakers, managing hospitality and logistics while leading a team responsible for content: drafting outreach and invitation communication to faculty and students, and writing interview scripts and questions for speaker sessions.
- Made strategic calls on speaker selection based on relevance and impact, translating club goals into an event delivery

roadmap for the team.

**Operations Assistant Coordinator -> Operations Manager, FCC (Finance and Consulting Club) · 1st-2nd Year**

- Started as Operations Assistant Coordinator in 1st year, **managing hospitality and logistics** for students attending campus

workshops and events.
- Promoted to Operations Manager in 2nd year, leading a team of associates to own end-to-end event execution -- hospitality, logistics, and overall smooth delivery.
- Successfully led operations for **Horizon**, the club's flagship finance and consulting event.

**Marketing Associate -> Ideation Manager, E-Cell (Entrepreneurship Cell) · 1st-2nd Year**

- Started as Marketing Associate in 1st year, driving publicity strategy for E-Cell events -- including unconventional **guerrilla marketing tactics** like branding coffee cups sold at campus cafés with event details, extending reach beyond typical channels.
- Promoted to Ideation Manager in 2nd year, owning event conceptualization end-to-end -- deciding speaker lineups, shaping event format to maximize impact, and overseeing outreach communication.
- Successfully led ideation and execution for **E-Summit**, E-Cell's flagship event.

- Active Institute Athletics Team member; active participant in **Milan** (Inter-Hostel) and **Diesta** (Inter-Department) sports leagues.

## HACKATHONS

- **Adobe University Hackathon 2026**: Competed among ~250,000 registered students; solved the Round 1 problem set (DSA and SQL). Round 1 results awaited.

## SKILLS

- **Data & AI:** SQL, Python (Pandas, Scikit-learn), Data Analysis, Applied Machine Learning (Random Forest), MS Excel
- **Product & Project Tools:** Oracle Primavera P6, AutoCAD, Solid Edge
- **Programming:** C, C++, Python, OOP, Data Structures & Algorithms

**- Product & Domain Exposure:** 0->1 Product scoping, MVP prioritization, Construction & Project Management, Sustainability

- **Leadership:** Team Management, Stakeholder Management, Cross-Functional Collaboration, Communication
