EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.54
DDPS	Class XII (CBSE)	2024	92.80%
CMS	Class X (ICSE)	2022	93.50%

SCHOLASTIC ACHIEVEMENTS

Certificate of Academic Excellence (IIT Hyderabad): Awarded for achieving the **highest CGPA** in B.Tech Civil Engineering (Jul-Dec 2024).

Competitive Programming: Achieved **Expert** rank on Codeforces (**Max Rating: 1656**) with **1000+** problems solved on **Codeforces** and **Leetcode** combined.

IICPC Codefest 2025: Ranked **761st out of 13,000+** global participants in this prestigious competitive programming event.

NSEJS (National Standard Examination in Junior Science): Selected among the **top 310 students nationwide** out of **10,000+ participants**.

Indian Olympiad Qualifier in Mathematics (IOQM): Qualified among the **top 300** students in the Uttar Pradesh region.

SKILLS

Languages: C++, JavaScript, Python

Backend: Node.js, Express.js

Frontend: React

Database: PostgreSQL, Prisma ORM, MongoDB, Mongoose

AI/ML: Google Gemini API, Prompt Engineering, Structured Output (Zod)

Tools: Git, GitHub, REST APIs, Vercel, Render

Concepts: Object-Oriented Programming, Data Structures & Algorithms

RELEVANT COURSES

Algorithms, Introduction to Probability, Statistics, Linear Algebra, Calculus, Complex Variables, Transform Techniques

PROJECTS

AI Interview Prep Platform | Node.js, Express, MongoDB, React, Google Gemini API | GitHub LiveDemo

- **Built a full-stack MERN application** that generates personalized interview preparation reports by analyzing a candidate's resume, job description, and self-description using **Google's Gemini API**.
- **Designed structured AI output** using **Zod schemas** to reliably generate match scores, technical/behavioral interview questions, skill-gap analysis, and day-wise preparation plans as validated JSON.
- **Implemented JWT-based authentication** with HTTP-only cookies and a token-blacklist strategy for secure logout, alongside **Multer**-based resume (PDF) upload and parsing.
- **Engineered an AI-driven resume generator** that produces ATS-friendly, tailored resumes as HTML and renders them to downloadable PDFs using **Puppeteer**.

Nexus Store -- E-Commerce Platform | React, Vite, Node.js, Express, PostgreSQL, Prisma | GitHub LiveDemo

- **Built a full-stack e-commerce application** with a Node.js/Express REST API and **PostgreSQL database hosted on Neon**, with the React/Vite client served directly by the backend for a single production deployment.
- **Engineered an ACID-compliant checkout engine** using **Prisma's $transaction API** to bundle inventory validation, stock deduction, order generation, and cart clearing into atomic operations, ensuring strict data integrity.
- **Implemented JWT-based authentication** with **bcrypt** password hashing, and developed custom **Role-Based Access Control (RBAC)** middleware to enforce strict authorization for sensitive catalog-management endpoints.
- **Enforced end-to-end request validation using Zod**; built a premium, responsive UI with **glassmorphism styling**.

LuminaChat -- Real-Time Chat Application | **React, Node.js, Express, Socket.IO, Prisma, PostgreSQL** | GitHub LiveDemo

- **Architected a production-ready real-time chat backend** with **Socket.IO** supporting multiple concurrent **WebSocket connections**, and instant message broadcasting across isolated chat rooms.
- **Designed and deployed a relational database schema** using **Prisma ORM** and **PostgreSQL** to persist user credentials, room state, and message history.
- **Implemented secure JWT-based auth** with **bcrypt** hashing; built a **Soft Neumorphic React/Vite UI** with **Tailwind CSS** and **Framer Motion** animations. Deployed on **Render + Vercel.**

EXTRACURRICULAR

Chess Team Member, National Sports Organization (NSO), IIT Hyderabad: Regularly competed in university-level chess tournaments.
