EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.68
SSV GYAN KENDRA SCHOOL	Class XII (CBSE)	2024	90.20%
SSV GYAN KENDRA SCHOOL	Class X (CBSE)	2022	95.80%

SCHOLASTIC ACHIEVEMENTS

Solved **850+ DSA problems** across CodeChef (4 star rating), LeetCode, Codeforces (expert rating) and other platforms, with a focus on **Dynamic Programming, Trees, Graphs,** and **Combinatorics**.

Rank 1 in **Optiver Tradeathon (**25k in prize**)**, outperforming participants in algorithmic trading strategy design and quantitative decision-making.

International Rank 1 in International Science Olympiad (Level 2) in class 11; **International Rank 21** in International Mathematics Olympiad (Level 2) in class 11; **International Rank 3** in International Mathematics Olympiad (Level 2) in class 6; secured multiple times **International Top-25** finishes across **Level 2** in **Mathematics**, **Science**, **Reasoning and Aptitude**, and **Information Technology Olympiads**.

Received merit awards from **SilverZone Foundation, Unified Council, ALLEN, and Resonance STaRT** for sustained scholastic excellence and top national/international performances.

Qualified for INChO 2024 via **NSEC 2023**; awarded **Certificate of Merit** for ranking among the **top 1% nationally**.

National Rank Top 10 on the **Unstop Coding Leaderboard**, demonstrating exceptional speed and problem-solving ability.

3rd Place in **Scribble Hackathon (IIT Hyderabad)** for developing a real-time human emotion detection and betterment computer vision system.

SKILLS

Languages: C++, C, Python, SQL

Frameworks & Libraries: MongoDB, Express.js, React.js, Next.js, Node.js, FastAPI, Tailwind CSS, NumPy, Pandas

Blockchain & Web3: Solana, Web3.js, SPL Tokens, Phantom Wallet Integration, Token Minting, Raydium Liquidity Integration

Tools & Technologies: Git, GitHub, CMake, Make, VS Code, Jupyter Notebook, REST APIs

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, STL, Dynamic Programming, Graphs, Trees, Combinatorics, Quantitative Trading, Order Book Simulation, Low-Latency Systems

PROJECTS

Founder, CEO & Full-Stack Developer - PumpCoinX (https://pumpcoinx.com) | Dec 2025 -May 2026

- Founded and deployed **PumpCoinX**, a a **trademarked and copyright-protected** no-code Solana memecoin launchpad enabling automated token creation, wallet integration, platform fee collection, and liquidity deployment.
- Developed the platform using **Python, React, Node.js, FastAPI, MongoDB, and Solana Web3**, implementing secure token minting, decentralized payment flows, end-to-end Web3 integration, and also optimized gas fees for less transaction cost.

Monte Carlo Option Fair Price Generator | C++ | GitHub

- Developed a C++ Monte Carlo pricing engine to estimate the fair value of European options using Geometric Brownian Motion and discounted payoff simulation.
- Implemented Black-Scholes analytical pricing, option Greeks, confidence intervals, convergence analysis, variance reduction techniques, and single-thread vs multi-thread benchmarking.

Rocket Development - Under Prof. Mahesh M. S.

- Designed, fabricated, and tested a **sugar-propellant model rocket**, gaining hands-on experience in rocket propulsion, aerodynamics, stability, and flight mechanics.
- Developed and experimentally evaluated the propulsion system, rocket body, and launch mechanism through iterative testing and performance analysis.

UAV Development | Under Prof. Vishnu Unni

- Built a custom **quadcopter UAV** from scratch by integrating the airframe, electronics, sensors, and embedded software.
- Implemented and tuned **PID-based flight control algorithms** to achieve stable flight through iterative calibration and real-world testing.

INTERNSHIPS

AI Trainer (RLHF) - Outlier (Scale AI) & Deccan AI | From Oct 2025

- Improved frontier LLMs through **Reinforcement Learning from Human Feedback (RLHF)** by evaluating **groundedness, truthfulness, logical reasoning, code quality, and instruction following**, contributing to high-quality AI model outputs.

RELEVANT COURSES

Probability, Statistics, Linear Algebra, Complex Variables, Transform Techniques, Introduction to Programming, Economics, Introduction to Entrepreneurship.

POSITIONS OF RESPONSIBILITY

Teaching Assistant - Introduction To Programming (Aug 2025 - Nov 2025)

Teaching Assistant (TA) under Prof. Srijith P.K. and Prof. Saurabh Kumar, assisted during lab sessions and exams of 600+ students in understanding and applying programming concepts in C language

Internship Coordinator, Office of Career Services, IIT Hyderabad (2026-Present)

Core Member, Robotix Club, IIT Hyderabad(25-26**):** Contributed to robotics projects and technical initiatives as part of **Project Quadrupled**

Core Member, Aero Club, IIT Hyderabad (2025-26**)**

EXTRACURRICULAR

Financial markets, quantitative trading, and business news; practicing mental math, logical reasoning, and problem-solving challenges and also enjoy skating, Garba, and painting, balancing analytical pursuits with creative and athletic activities.
