EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	7.88
Sri Chaitanya Junior College	Class XII (Telangana State Board of Intermediate Examination)	2023	0.98%
Kennedy High the Global School	Class X (CBSE)	2021	0.95%

WORK EXPERIENCE

NuPlay (previously Nurix) -- Enterprise Voice/Chat-AI Company

Growth Intern, Product & GTM

- **Shipped 15+ applications end-to-end** across Next.js/TypeScript, Python and Node, owning product scoping, development and live client demos; contributed to **$100K in new revenue** through a Jomashop voice-AI support demo.
- **Engineered two enterprise operations consoles** in Next.js/TypeScript (~13K and ~12K LOC), strengthening reliability with **494 build-failing verification checks** across both products.
- **Built AI-powered product workflows**, including Claude tool-use agents with provenance, multi-agent voice pipelines (STT LLM TTS), and a real-time LiveKit call interface with transcript streaming and offline simulation.
- **Drove product and GTM initiatives** by analyzing a 600+ deal funnel, redesigning pricing from per-minute to outcome-based, and shipping a production React ROI calculator used in live sales conversations.

Shayani Farms - agri D2C brand

Product & Data Intern

- Led development of new mango-based product variants by conducting customer research, designing packaging, and executing go-to-market and sales strategies, improving brand visibility and engagement across retail and online channels.
- Leveraged Python and Pandas to clean and analyze 2,000+ sales records, identify purchasing patterns, and enable smart harvesting decisions, leading to optimized inventory planning and a 15% reduction in seasonal product wastage.

PROJECTS

End-to-End Hiring Platform:

(self-driven: discovery to shipped build)

- Owned the full product lifecycle for **US retail frontline hiring**.
- Diagnosed a **20-step funnel**, tore down Fountain and Paradox, authored the PRD, and built the product itself, **12 surfaces over one workflow engine**.
- Codified a human-only decision boundary (a model may screen and recommend, never approve or reject) and logged **31 decisions with reversal conditions**; replaced a vendor's 19% claim with 8.9% from US Census data

Payer IVR Navigator:

(voice-AI demo)

- Automated payer phone-tree navigation by DTMF, holding on compute and warm-transferring to a human rep on pickup.
- Quantified it as buyer economics, cost per claim $12.16 to $3.90, 68% lower, and engineered an offline simulate mode so a live demo cannot fail on the network.

Project Peacock:

(mobile app for loan agents)

- Digitised the DSA loan pipeline with a 7-stage deal tracker and a 4-in-1 calculator.
- Eliminated per-call speech cost with a zero-cost Indian-English voice command system (Web Speech API plus a rule-based parser for lakh/crore amounts and Hindi dates).

HACKATHONS

NuPlay Internal Hackathon - Automated Equity Research

- **Automated equity research** by converting annual-report PDFs into a **19-sheet Excel financial model**, AI-written investment report, and ranked recommendations.
- **Engineered a two-pass extraction pipeline** using PDF parsing and LLM-based gap filling, with **every financial figure traced to its source page** for verification.
- **Streamlined the analyst workflow** from unstructured filings to structured financial analysis, reducing manual extraction and enabling faster, reproducible research.

POSITIONS OF RESPONSIBILITY

Coordinator, Corporate Partnerships and Growth Domain, Finance and Consulting Club

Led corporate outreach, proposal drafting, and relationship management for collaborations.

Class Representative, Chemical Engineering Department

Liaised between students and faculty, coordinating communication, scheduling, and issue resolution.

EXTRACURRICULAR

Member, Inter IIT Cultural Fest Contingent: Represented IIT Hyderabad in dance competitions at national-level Inter IIT Cultural Fest.

Swimming NSO Team: Participated in structured training, stroke refinement, and inter-collegiate competitions.

SKILLS

Product: discovery, PRD and spec writing, user research, funnel and conversion analysis, metrics design, competitive teardowns, pricing and ROI modelling, executive communication, rapid prototyping.

Languages: Python, TypeScript / JavaScript, SQL, C / C++, HTML / CSS (some Java via Spring Boot).

Frameworks: React, Next.js, Node / Express, FastAPI, Tailwind; Pandas, NumPy, Scikit-learn.

AI / LLM: Claude and Gemini APIs, tool-use / function calling, multi-agent orchestration, LangGraph, prompt engineering, retrieval over document corpora.

Tools & Platforms: Git / GitHub, Docker, Vercel, AWS (basic), PostgreSQL / Supabase, SQLite, Twilio, LiveKit.

Practices: REST API design, automated tests and build-time verification, code review, Agile delivery.
