EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	8.81
Saint Paul Higher Sec School Murwara Katni	Class XII (CBSE)	2023	75.00%
Saint Paul Higher Sec School Murwara Katni	Class X (CBSE)	2021	79.00%

PROJECTS

Discover Your Career Path

- Conducted user research with rural students to identify barriers in career awareness and access to educational opportunities.
- Designed a human-centered career exploration toolkit using information architecture, visual communication, and iterative prototyping.
- Developed an interactive solution that simplifies career discovery and supports informed academic and career decision-making.

EchoSense - Adaptive Accessibility System

- Investigated accessibility challenges faced by users with hearing impairments while consuming films and digital media.
- Designed a multimodal accessibility system featuring adaptive subtitles and visual sound cues to improve comprehension and emotional engagement.
- Applied inclusive design principles through user-centered research, interaction design, and iterative concept development.

Falcon Talon - Precision Knife

- Designed an ergonomic precision knife inspired by the grip and control of a falcon's talon to improve comfort and cutting precision.
- Explored multiple form iterations through sketching, ergonomic evaluation, CAD modeling, and product refinement.
- Balanced functionality, manufacturability, and visual aesthetics to create a professional product concept.

SilentCall - Wearable Silent Attention System

- Identified a real-world communication challenge through contextual observation and designed a wearable system enabling people with temporary or permanent speech impairments to silently request attention.
- Iteratively developed the concept from an initial ring exploration to an ergonomic paired bracelet featuring tactile touch interaction, haptic feedback, and low-power wireless communication.
- Leveraged AI for concept exploration, visualization, and presentation while independently directing problem definition, design evaluation, interaction design, and final product decisions.

OrbitPod - Immersive Gaming Workstation

- Designed an integrated gaming workstation that combines seating, display positioning, and ergonomic comfort into a unified product.
- Explored multiple concepts before developing a rotating monitor mechanism inspired by the motion of a hamster wheel.
- Created detailed CAD models and product renderings while considering user experience, adjustability, and manufacturability.

POSITIONS OF RESPONSIBILITY

Coordinator - Design Creatives, Elan & nVision

- Contributed to branding, posters, rulebooks, event creatives, and on-campus promotional materials.
- Collaborated with cross-functional teams to deliver visual assets for one of IIT Hyderabad's flagship technical and cultural festivals.

Design Head - Institute Technical Council (ITC)

- Led the development of the organization's visual identity and branding.
- Designed social media creatives, promotional materials, and branding assets while coordinating design activities across technical clubs.

SKILLS

Product Design - Human-Centered Design, Product Development, Concept Development, Ergonomics, Design Thinking

Industrial Design - Product Sketching, CAD Modeling, Form Exploration, Rapid Prototyping, Material Exploration

Design Research - User Research, User Interviews, Contextual Inquiry, Persona Development, Journey Mapping

UX/UI Design - Wireframing, Information Architecture, User Flow, Interactive Prototyping, Usability Principles

Visual Communication - Branding & Identity, Typography, Information Visualization, Presentation Design

Software - Figma, Fusion 360, Adobe Illustrator, Adobe Photoshop, Blender

RELEVANT COURSES

Relevant Courses - Basics of Product Design, Computer-Aided Design, Materials & Design, Nature and Form, Furniture Design, Universal Design, Design for Sustainability, Basics of Interaction Design, AI in Design, Data & Information Visualization, Publication Design.
