# Lakshmipuram Laasya Priya

co24btech11013@iith.ac.in | laasyapriya.19.07@gmail.com | +91 8374860939 | LinkedIn | GitHub

## EDUCATION

| Institution | Degree / Board | Passing Year | Score / CGPA |
|---|---|---|---|
| Indian Institute of Technology Hyderabad | B.Tech | 2028 | 7.26 |
| Trividyaa Junior College | Class XII (TGBIE) | 2024 | 98.20% |
| St. Ann's High School | Class X (ICSE) | 2022 | 96.20% |

## EXPERIENCE

**AI/ML Intern | BlockTXM Inc.**

- Developed **LLM powered applications, AI agents, and RAG workflows**, integrating models with external tools, information sources, and services using n8n, OpenLLM, MCP, and Workato.
- Contributed to **REST APIs and database integrations** using FastAPI, Express.js, React, Next.js, TypeScript, and PostgreSQL.
- Evaluated AI outputs, investigated unexpected model behavior, conducted **functional testing and Git based code reviews**, and documented technical decisions.

**AI Engineer | Soul AI, Deccan AI**

*Jan 2026 - May 2026 (Freelance)*

- Evaluated **AI-agent workflows and AI-generated code** across Python, C++, Linux, and Bash, analyzing execution traces, failure patterns, and task outcomes to identify root causes and improve system reliability.
- Designed **structured test cases and verification workflows** to assess model and system **accuracy, edge-case handling, failure modes, and robustness**, distinguishing critical issues from lower-impact failures.
- Debugged and validated AI-generated solutions through **systematic experimentation and code-level analysis**, using Python and C++ to investigate unexpected behavior and improve the reliability of AI-driven workflows.

## PROJECTS

**FraudLens CRM - AI Powered Sales & Risk Intelligence Platform** *(Github)*

*Python, React.js, TypeScript, PostgreSQL, Docker, LLM APIs*

- Built a **full stack CRM platform** with deal tracking, lead management, and AI powered insights that analyze customer interactions and predict deal success probability.
- Implemented **LLM based analysis** to summarize sales conversations, extract intent and sentiment, and recommend next actions for lead prioritization.
- Designed a responsive React dashboard with **Kanban pipelines** and analytics charts, implemented **WebSocket based real time updates**, and deployed the application using **Docker and CI/CD pipelines**.

**Plagiarism Detector - Code Similarity Detection System** *(Group Project) (Github)*

*C++, STL, OOP, Multithreading, Dynamic Programming*

- Developed a **C++ code similarity detector** using **tokenization and pattern matching** to identify exact sequences of 10-20 tokens and **fuzzy matches** longer than 30 tokens with at least **80% similarity**.
- Implemented **LCS based pairwise comparison** using dynamic programming to detect overlapping and modified code patterns across submissions.
- Parallelized submission comparisons using **std::thread** and protected shared data with **mutexes** processed submissions by timestamp to identify likely original and copied work.

**Advanced Operating Systems Extensions in xv6** *(Github)*

*C, xv6, Kernel Programming, Process Scheduling, Virtual Memory*

- Extended xv6 by implementing **custom kernel system calls and process accounting**, including per-process statistics through modifications to core kernel subsystems.
- Designed and implemented an **SC-MLFQ scheduler** with priority boosting, interactive process prioritization, and

scheduler performance monitoring.
- Built a **virtual memory subsystem** with Clock page replacement, swap-space management, disk backed paging, configurable **FCFS/SSTF** disk scheduling, and **RAID based storage simulation** for swap operations.

## SKILLS

- **Programming Languages:** C, C++, Python, SQL, MATLAB
- **Frameworks and Libraries:** PyTorch, scikit-learn, Pandas, NumPy, Matplotlib, React, Next.js, FastAPI, Express.js
- **Systems and Backend:** Linux, Bash, OOP, Data Structures and Algorithms, Operating Systems, Multithreading, DBMS, PostgreSQL, REST APIs, WebSockets
- **AI and ML:** LLMs, RAG, RLHF Evaluation
- **Developer Tools:** Git, Docker, VS Code, Jupyter Notebook

## RELEVANT COURSES

- **Computer Science**: Introduction to Programming ,Data Structures & Applications, Algorithms, Operation Systems I & II

- **Mathematics**: Probability, Introduction to Statistics, Linear Algebra, Calculus, Transform Techniques, Differential Equations, Complex Variables

## POSITIONS OF RESPONSIBILITY

- **Internship Coordinator, Office of Career Services' 26** - Spearheaded recruiter outreach, building relationships with **HR and talent acquisition teams**, coordinating **hiring discussions**, and expanding i**nternship and placement opportunities** for IIT Hyderabad students.
