EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2026	7.32
VAARADHI VIDHYAPEET JUNIOR COLLEGE	Class XII (Telangana State Board of Intermediate Education)	2023	96.10%
CITY MODEL HIGH SCHOOL	Class X (Board of Secondary Education, Telangana)	2021	100.00%

WORK EXPERIENCE

AI Developer Intern | Diagonal Matrix

- Contributed to an **AI-powered Data Model Accelerator** that transforms business requirements into structured data models, SQL schemas, synthetic datasets, and analytics-ready outputs.
- Designed and refined AI prompts and workflows for schema generation, validation, synthetic data generation, and PostgreSQL integration, including DDL-driven validation of primary and foreign key constraints.
- Built and tested SQL workflows using JAI/Langflow, Docker, and PostgreSQL, and performed API and end-to-end testing using Postman.

POSITIONS OF RESPONSIBILITY

Head of Hospitality (2025-2026) & Hospitality Coordinator (2024-2025) -- EML, IIT Hyderabad

- Progressed from Coordinator to Head, managing guest hospitality, logistics, and event operations; coordinated **4 events including the H.C. Verma event** and led the hospitality team.

Hospitality Coordinator -- DIESTA, IIT Hyderabad | *2024-2025*

- Coordinated hospitality for **15 inter-departmental events**, managing participant requirements and logistics.

Hospitality Coordinator -- Inter-IIT Sports Meet, IIT Hyderabad | *2025*

- Coordinated hospitality and logistics for **visiting IIT contingents**, including accommodation, transportation, and food.

SKILLS

Programming Languages: C, C++, Python, SQL

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn, PyTorch

Web & Databases: HTML, CSS, MySQL, PostgreSQL

Tools & Other: Git, GitHub, Docker, Postman, Langflow, LaTeX, RISC-V

RELEVANT COURSES

Computer Science: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Architecture, Compilers, Data Mining, Predictive Modelling

Artificial Intelligence: Computer Vision, Natural Language Processing, Deep Learning, Reinforcement Learning, Foundations of Machine Learning, Probability and Random Variables.

PROJECTS

Grocery Management Web Application -- Dr. Shirshendu Das | Mar 2025 - Apr 2025

- Developed a Django-based grocery management system with HTML/CSS frontend and MySQL backend, supporting customer and seller operations.
- Designed a BCNF database schema covering customers, sellers, products, orders, ratings, and delivery partners; implemented stored procedures, triggers, and indexes for order processing, stock validation and updates, rating validation, and efficient query execution.

RISC-V Assembler -- Dr. Rajesh Kedia | Aug 2024 - Sep 2024

- Developed a C-based RISC-V assembler to parse assembly instructions and generate their corresponding machine-code and hexadecimal representations.
- Implemented support for R-type and I-type instruction formats, handling registers, instruction fields, and immediate values throughout the encoding process.

Reliability-Aware Test-Time Adaptation -- Dr. Konda Reddy | Jan 2026 - Apr 2026

- Proposed a reliability-aware Test-Time Adaptation framework incorporating MEBN (Memory-Enhanced Batch Normalization) for stable adaptation.
- Used ResNet-18 trained on CIFAR-10 and tested on CIFAR-10-C with Gaussian, Shot, and Brightness Noise at batch sizes 4, 8, 16, and 32.
- Achieved up to 38% reduction in TENT error at batch size 4, demonstrating improved robustness across corruptions.

Culture-Aware Named Entity Recognition (CSI-NER) -- Dr. Maunendra Desarkar | Jan 2026 - Apr 2026

- Designed a MuRIL Transformer-based NER system for identifying 7 Indian cultural entity types: FOOD, FESTIVAL, RITUAL, FASHION, PLACE, ARTFORM, and LANGUAGE.
- Created synthetic training data by combining DIWALI and DOSA datasets using templates and BIO tagging.
- Recorded 100% F1 in-domain and 95.49% F1 on unseen data, showing strong performance on culturally specific entities.

Machine Learning Models from Scratch -- Dr. K. Sri Rama Murthy | Mar 2025 - May 2025

- Implemented Perceptron, Logistic Regression, Least Squares, Regularized Regression, and KNN for classification and regression using Python/NumPy, without scikit-learn.
- Implemented Gradient Descent, ML, and MAP estimation using synthetic Gaussian datasets.
- Analyzed model behavior through decision boundaries and prediction comparisons, focusing on optimization, regularization, and generalization.
