EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.21
Pradip School & Jr. collage Ramapur.	Class XII (Maharashtra State Board of Secondary & Higher Secondary Education,Pune.)	2021	89.33%
Pandit Vishnu Digambar Paluskar Madhyamik Vidhyalay Palus.	Class X (Maharashtra State Board of Secondary & Higher Secondary Education,Pune.)	2019	83.80%

POSITIONS OF RESPONSIBILITY

Placement Coordinator at OCS, IIT Hyderabad: Coordinated with companies and HR representatives for internship and placement opportunities, facilitating industry outreach and recruitment-related activities.

PG Mentor - Sunshine, IIT Hyderabad: Guided and supported incoming PG students in adapting to campus life, addressed their concerns, and organized mentor-mentee interactions and student engagement activities.

SKILLS

Programming & Data Analysis: Python, SQL, Pandas, NumPy, Scikit-learn

Machine Learning: Regression, Classification, Clustering, Feature Engineering, Feature Selection, Ensemble Learning, Random Forest, Gradient Boosting, XGBoost, Model Evaluation

Statistics & Analytics: Exploratory Data Analysis (EDA), Hypothesis Testing, Statistical Testing, A/B Testing, Correlation Analysis, Outlier Detection

Data Visualization & BI: Power BI, Matplotlib, Dashboard Development, Data Visualization

Databases & Tools: MySQL, Google Colab, Jupyter Notebook, Git, GitHub

Deep Learning & AI: TensorFlow, Neural Networks.

RELEVANT COURSES

Courses on Campus

- **AI & Informatics**: AI in Ophthalmic Informatics
- **Computational Methods**: Computational & Numerical Methods
- **Ophthalmic Imaging**: Multidisciplinary Ophthalmic Imaging

PROJECTS

Pharma Sales Intelligence & Demand Forecasting Platform GitHub

Python, SQL, MySQL, Scikit-learn, XGBoost, Pandas, NumPy, Power BI

- Developed an end-to-end **pharmaceutical demand forecasting pipeline** using 2,106 daily observations; performed

data quality checks, EDA, category contribution analysis, seasonality analysis, outlier detection and statistical hypothesis testing.
- Engineered **calendar, lag and leakage-safe rolling-window features** and compared Linear Regression, Random Forest, Gradient Boosting and XGBoost using a chronological 80/20 holdout; Random Forest achieved **22.8% WAPE**, improving WAPE by **25.2% vs. the naive baseline**.
- Built **MySQL analytics and an interactive Power BI dashboard** to monitor category demand, seasonality, forecast performance and errors; identified **N02BE as the dominant category (~49.4% of total sales)** and analyzed demand spikes to support inventory prioritization.

ISIC-2020 Melanoma Classification Using Deep Learning GitHub

Python, TensorFlow, Scikit-learn, NumPy, Pandas, CNN, ResNet50, MobileNetV2, Google Colab

- Developed and compared **8 deep-learning approaches** for melanoma classification on the highly imbalanced ISIC-2020 dataset, including CNN variants, augmentation, class weighting, batch normalization, ResNet50 and MobileNetV2 transfer learning.
- Built an end-to-end **Python ML pipeline** covering image preprocessing, stratified dataset splitting, model training and evaluation using ROC-AUC, balanced accuracy, precision, recall, F1-score and confusion matrices.
- Analyzed **class imbalance and threshold trade-offs**, demonstrating that baseline models could achieve ~98% accuracy while producing near-zero melanoma recall; MobileNetV2 achieved **0.793 ROC-AUC and 88.0% melanoma recall** at the 0.5 threshold.

EXTRACURRICULAR

Chess: Represented **Bhabha Hostel** in **Milan 2026**, IIT Hyderabad.
