EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2028	7.93
Dalton junior college	Class XII (Board of Intermediate Education,Andhra Pradesh)	2024	98.80%
Pollocks High school	Class X (Board of Secondary Education,Andhra Pradesh)	2022	98.00%

POSITIONS OF RESPONSIBILITY

Sponsorship Head | **Abhyanth, IIT Hyderabad Sports Fest(2026-2027)-**

- **Led the Sponsorship vertical for Abhyant 2026**, driving strategic brand partnerships and leading a team to secure funding and in-kind collaborations for IIT Hyderabad's 3-day sports festival.
- **Reached out to 100+ companies and potential partners**, managing sponsorship pitches and negotiations that resulted in a strong portfolio of sponsors and valuable funding/in-kind support for the fest.

Interview and Hosting Head | **Media Council (2026-2027)**

- **Led the Interview & Hosting vertical**, overseeing the planning, coordination, and execution of institute-level interviews, anchoring, and hosting activities for major campus events.
- **Coordinated with guests, speakers, and student teams**, managing interview preparation, event flow, and on-stage execution to ensure professional and engaging institute-level programs.

Sponsorship Coordinator | **Milan (2025-2026)**

- **Pitched to 200+ companies** for sponsorship opportunities, driving outreach and converting prospects into sponsorship negotiations.
- **Generated the highest number of positive responses in the team**, contributing significantly to sponsor acquisition and partnership development.

Editorial Coordinator | **Media Council (2025-2026)**

- **Worked in the Editorial vertical**, contributing to institute magazines, social media posts, and other official publications through writing, editing, and content development.
- **Generated creative content ideas and concepts** for institute events and initiatives, collaborating with the editorial team to produce engaging and impactful communication.

SKILLS

Programming Languages: C, C++, Python, SQL.

Libraries & Visualization: NumPy, Pandas, Matplotlib,SQLite.

Tools: Git, GitHub, Solid Edge.

Others: Data Structures and Algorithms, Operating Systems, Object-Oriented Programming, Jupyter Notebook, LaTex.

RELEVANT COURSES

Computer Science Courses - Introduction to Programming | Data Structures & Applications | Operating Systems

Computational Courses - Computer Aided Numerical Methods | Fundamentals of Scientific Computing | Computational Methods in Material Science | Electronic Structure and Atomistic Modeling of Materials

Math Courses - Calculus | Linear Algebra | Differential Equations | Introduction to Probability | Transform Techniques | Introduction to Statistics | Complex Variables

Entrepreneurship Courses - Intro to Entrepreneurship | Fundamentals of Organizational Structure

PROJECTS

Public Grievance Performance & Priority Analysis | Python, SQL, Pandas:

- Analyzed **36 State/UT-level public grievance records** from the Government Open Government Data platform using **Python (Pandas, NumPy)** to assess grievance workload, disposal performance, and regional variation.
- Performed statistical and exploratory analysis using descriptive statistics, distributions, outlier analysis, and correlation to identify workload concentration and disposal-rate patterns across States/UTs.
- Built a **data-driven priority framework** combining grievance volume and disposal-rate performance to flag high-workload regions requiring closer administrative review.

Age Prediction of Abalone using k-Nearest Neighbors

- Implemented the **k-Nearest Neighbors (k-NN) regression algorithm from scratch**, using Euclidean distance to predict abalone age from physical characteristics without relying on built-in ML libraries.
- Performed **data preprocessing and feature preparation** to transform the raw abalone dataset into a suitable format for distance-based prediction and improve the reliability of model outputs.
- Experimented with multiple values of **k** and evaluated model performance using **Mean Squared Error (MSE)** on unseen data to identify the optimal neighborhood size for prediction.
- Visualized the relationship between **k and prediction error**, analyzing model performance across different configurations to select the best-performing k-NN model.

Statistical Inference and Modeling with Real Data

- Analyzed **two real-world datasets** using descriptive statistics, graphical methods, probability distributions, and statistical inference to identify patterns and summarize key characteristics.
- Modeled **global video game sales** using **Gamma and Normal distributions**, estimating distribution parameters through **Method of Moments (MoM)** and **Maximum Likelihood Estimation (MLE)**.
- Analyzed **Virat Kohli's IPL performance data** using statistical measures and visualizations to study scoring patterns and performance variation across matches/seasons.
- Applied **confidence intervals and hypothesis testing** to evaluate statistical assumptions and derive meaningful conclusions from real-world data.
