EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	9.11
Sri Chaitanya Junior Kalasala	Class XII (BIEAP)	2020	94.40%
Gowtham High School	Class X (BSEAP)	2018	10.00%

SCHOLASTIC ACHIEVEMENTS

- **Selected as Top 10 Finalists** out of **5,407 registered participants** in the **Accenture Innovation Challenge 2026**

POSITIONS OF RESPONSIBILITY

E-Cell, IIT Hyderabad | Startup Partnerships and Outreach Manager

- **Coordinate** with startup founders as speakers, mentors, and judges for E-Cell events, **connecting** students with real-world entrepreneurial experience

MSME Tech Connect, IIT Hyderabad | Overall Head - Event Management

Ministry of MSME-backed industry event

- **Led** end-to-end planning and execution of a Ministry-backed industry event, **overseeing** logistics, finances, and stakeholder engagement across **90+ exhibitors, 25+ investors, and 1,500+ visitors**

SKILLS

Programming Languages: Python, SQL

Python Libraries: NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow, Keras, LangChain, OpenCV

Core Competencies: Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI (GenAI), Time Series Forecasting, Statistical Modeling, Probability & Statistics, Feature Engineering, Agent-Based Systems (RAG)

Tools & Platforms: Google Colab, Jupyter Notebook, Kaggle, PostgreSQL

Soft Skills: Communication, Leadership, Problem-Solving, Collaboration, Stakeholder Management, Adaptability

PROJECTS

Hybrid SARIMA and SVR Prediction Approach for Forecasting X-Ray Film Consumption

- **Built** a hybrid **SARIMA + SVR** forecasting model on real hospital data (**241 days**) to predict daily X-Ray film consumption
- **Identified optimal parameters** using **ADF, ACF, and PACF tests**, then modelled SVR on residuals clustered by day-of-week
- **Reduced RMSE by ~26% and MAE by ~10%** over the SARIMA baseline, **enabling** data-driven hospital inventory planning

Text-to-SQL Agent for Natural Language Database Search, Cresen Solutions

- **Built** a Text-to-SQL system using **LangChain agents** to translate natural language into queries on a **PostgreSQL** database
- **Integrated RAG** and dynamic few-shot prompting, **improving** SQL query generation accuracy for complex, multi-table queries

WhyChain - Explainable AI Engine for Business Intelligence

- **Built a KPI root-cause analysis engine** combining anomaly detection, statistical modeling, causal inference, and LLM-based evidence generation.
- **Integrated LLMs to interpret unstructured customer and operational text and generate evidence-backed explanations**, while keeping quantitative computations deterministic and verifiable.
- **Benchmarked on 160 labelled cases**, achieving **64.4% Top-1 accuracy** on material movements, **87.5% rejection of correlation traps**, and **0% false alarms** on pure-noise cases.

INTERNSHIPS

User Research and Design Intern | Suzuki Innovation Centre

- **Conducted** 50+ field interviews with Suzuki Motor Corporation stakeholders, **identifying** user pain points and workflow requirements
- **Researched** Small Medium Businesses and handloom sector challenges in India, **surfacing** technology-driven opportunities to improve operational efficiency

Data Science Intern | Cresen Solutions

- **Built** machine learning and deep learning models on multiple datasets for predictive analytics using **Microsoft Fabric**
- **Developed** a Text-to-SQL model to convert natural language questions into SQL queries
- **Automated** data extraction and reporting workflows using **Microsoft Power Automate**, **reducing** manual effort in recurring data tasks

RELEVANT COURSES

Machine Learning, Deep Learning, Image Analysis, Text Analytics for Business

EXTRACURRICULAR

- **Sports & Recreation:** Playing table tennis
- **Community Involvement:** Volunteered at the Learn In Bharat (LIB) Program 2026, a Suzuki-backed initiative by Next Bharat Ventures
