EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.84
M.H high school and junior college, Thane	Class XII (Mahashtra State Board of senior secondary education)	2023	91.00%
D.A.V Public school, Airoli	Class X (Central Board of secondary education)	2021	96.20%

INTERNSHIP EXPERIENCE

Zinnia Digital Services LLP - SDE Intern (Hyderabad)

AI-Powered Medical Document Summarizer

- Improved medical-document RAG retrieval by integrating **Reciprocal Rank Fusion (RRF)** with a **hybrid reranking stage and MMR**, combining multiple retrieval signals to provide more relevant context to the LLM.
- Developed an automated **six-metric evaluation framework** covering factual consistency, semantic similarity, information coverage, medication accuracy, allergy accuracy, and lab-value accuracy to assess both summary quality and clinically sensitive information preservation.
- Benchmarked generated summaries across the six metrics, achieving **0.936 factual consistency, 0.850 information coverage, and 0.875 lab-value accuracy**, enabling systematic comparison of summarization configurations and identification of summaries requiring human review.

Code Intelligence Chatbot

- Co-developed an enterprise code-intelligence platform enabling natural-language querying across repository architectures, APIs, and business logic workflows.
- Worked on a **hybrid RAG pipeline** combining LLM-based intent/capability routing with **Neo4j knowledge-graph retrieval, MongoDB blueprint search, and vector similarity search** over API endpoints using text-embedding-3-large.

Adaptive Handwritten Data Extraction

- Engineered **field-aware prompt strategies** to extract diverse handwritten form fields into structured data, adapting instructions to field semantics and varying document layouts.
- Evaluated **multiple AI models and prompt configurations** across heterogeneous form fields, refining model-prompt combinations for improved extraction accuracy and robustness to handwriting variability.

PROJECTS

DNS Resolver - GitHub

- Implemented a **DNS resolver in C++**, handling domain-name resolution and parsing DNS responses to retrieve records from DNS servers.
- Built the resolver from the protocol level to understand **DNS packet structure, query/response handling, and recursive resolution concepts** without relying on a high-level DNS library.

Conway's Game of Life -- Cellular Automata & Neural Prediction - GitHub

- Developed a **C++/Raylib implementation of Conway's Game of Life**, simulating cellular-automata evolution with an interactive visualization of successive generations.
- Integrated a **PyTorch U-Net model** to learn and predict the next Game-of-Life state from board configurations, combining deterministic simulation with neural next-state prediction.

RBAC Authorization Platform - GitHub

- Contributed to a **role- and attribute-based authorization platform** supporting fine-grained access decisions based on user roles, attributes, resources, and policies.
- Designed authorization logic around **policy evaluation and access-control rules**, providing a foundation for enforcing permissions across protected application resources.

PINN for Solving Wave Equation - GitHub

- Designed a PINN to solve the wave equation, leveraging curriculum learning and engineered loss functions (boundary, normalization, and physics-informed) for stable training.
- Implemented gradient-based optimization with autograd and Adam, and extended model to learn unknown parameter using joint optimization

SKILLS

- **Languages:** C++, Python, JavaScript, SQL
- **AI & Machine Learning:** PyTorch, RAG Pipelines (RRF, MMR, Hybrid Reranking), LLM Evaluation, Vector Embeddings, Knowledge Graphs, Physics-Informed Neural Networks (PINNs)
- **Databases & Developer Tools:** Neo4j, MongoDB, Raylib, Git, Linux, VS Code, Postman
- **Core Concepts & Engineering:** Data Structures & Algorithms, System Programming, Network Protocols, Access Control (RBAC/ABAC), REST APIs, OS, DBMS

KEY ACHIEVEMENTS

- **DSA Problem Solving:** Solved **300+ DSA problems** across LeetCode and NeetCode
- **Competitive Programming:** Achieved peak rating of 1373 (Pupil) on Codeforces platform.
- **INSPIRE-SHE Scholarship:** Awarded by the Govt. of India (top 1% rank) in MH State Board Class XII.

RELEVANT COURSES

- **Computer Science:** Data Structure & Applications, Introduction to Programming, Introduction to AI.
- **Mathematics:** Elementary Linear Algebra, Calculus, Introduction to statistics, Introduction to Probability, Advanced Mathematical Physics, Non Linear Dynamics.

POSITIONS OF RESPONSIBILITY

- **Class Representative** of EP'23 batch
- **Tinkerer's Lab, IIT Hyderabad:** Mechatronics Core
- **TedX, IIT Hyderabad:** Hospitality and Logistics Core
