EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.19
Shri Mahavir Marwadi Junior College Of Science	Class XII (Maharashtra State Board)	2022	92.00%
Progressive English School	Class X (CBSE)	2020	90.00%

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern | Aditya Birla Fashion and Retail Ltd. (ABFRL) -- TMRW House of Brands

Dec 2025 - Jun 2026 | Bengaluru | **[TIGC] [UBRANO] [Bewakoof]**

- Engineered **dynamic quick filters** for the TIGC e-commerce platform, enabling faster product discovery and improving frontend interactions.
- Optimized **frontend performance** across TIGC and UBRANO by identifying rendering and asset-loading bottlenecks and improving page responsiveness.
- Built a **Next.js-based internal image upload tool** using **AWS S3 presigned URLs** for secure, direct client-to-cloud image uploads.
- Integrated **refund APIs** into the PG refund workflow, providing brand teams with end-to-end visibility into users' refund status and transaction timelines.
- Developed the **Shop the Look** experience as an interactive **vertical carousel**, dynamically rendering videos/images and associated product cards with direct **PDP routing** for seamless bundle-based shopping.

PROJECTS

BERT-Powered Twitter Sentiment Analyzer[Github Link]

- **Built a real-time Twitter sentiment analyzer** using Streamlit and a fine-tuned DistilBERT model for fast and accurate predictions.
- **Integrated Twitter API** to fetch live tweets based on hashtags or keywords, along with support for custom user input.
- **Classified sentiments** into positive, neutral, or negative using the BERT-based model trained on labeled data for high accuracy.

Financial AI Agent[Live Link]

- Engineered a full-stack **AI financial research platform** using Next.js and FastAPI to aggregate market data, news, sentiment, and SEC filings for stock analysis.
- Integrated **Gemini LLM** to transform multi-source financial signals into structured, natural-language research reports and market insights.
- Implemented financial data and NLP pipelines using **yFinance, SEC EDGAR, VADER Sentiment, Pandas, and NumPy**, with configurable caching and API-driven data retrieval.
- Containerized and deployed the backend with **Docker on Render** and the frontend on **Vercel**, implementing environment variables, CORS, and automated GitHub-based deployments.

CodeCompass | LeetCode Analytics Platform[Live Link]

- Developed a **LeetCode analytics platform** using **Next.js, TypeScript, and Tailwind CSS** to analyze public profiles, problem-solving statistics, contest performance, and submission activity.
- Built interactive analytics for **contest rating trends, difficulty distribution, submission consistency, streaks, rankings, and recent submissions** to help users track DSA progress.
- Implemented a **rule-based recommendation engine** that generates personalized improvement suggestions and an interview-readiness score from user activity and contest data.

SKILLS

Technical Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database

Management Systems (DBMS)

Programming Languages: C++, Python, TypeScript, HTML, CSS, Shopify Liquid

Frameworks & Libraries: Next.js, React, FastAPI, Tailwind CSS, NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, TensorFlow, Keras

Databases & Tools: SQL, Docker, AWS S3, Git, GitHub, Streamlit

RELEVANT COURSES

Data Structures and Algorithms(GeeksforGeeks) - Fundamental concepts of data structures and algorithms including problem-solving techniques, algorithm design paradigms, time and space complexity analysis, and optimization strategies.

Machine Learning Specialization

- **Supervised Machine Learning**: Learned regression, classification, and evaluation techniques.
- **Advanced Learning Algorithms**: Explored neural networks,deep learning strategies,performance optimization.
- **Unsupervised Learning & RL**: Covered clustering, recommender systems, and basics of reinforcement learning.

Academic Coursework: Introduction to Programming, Introduction to Artificial Intelligence, Applied Mathematics, Numerical Methods

SCHOLASTIC ACHIEVEMENTS

Solved **700+ problems on LeetCode**.

Solved **450+ problems on GeeksforGeeks.**

POSITION OF RESPONSIBILITY

Multimedia Coordinator - International Relations Cell | 2024-2025

- Covered campus events, managed social media posts, and created reels for outreach and visibility.
- Worked during **Japan Day, the PBL program**, and workshops, handling event coverage and media support.
