EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	7.67
Mothers' International Academy	Class XII (CBSE)	2022	94.00%
Carmel School	Class X (ICSE)	2020	98.40%

EXPERIENCE

AI Analyst Intern, EY (Ernst & Young)

(3-months Summer Internship | Agentic AI & Intelligent Automation) , Jun 2026 - Aug 2026

- **Role:** Sole engineer on Aurora Ops, an agentic AI platform for **autonomous IT operations**, adopted as the flagship internship deliverable and presented to senior stakeholders.
- **Impact:** Cut a routine diagnose-and-remediate sweep from **~30 minutes of manual checks to under 10 seconds (30x faster)**, orchestrating 8-14 LLM calls per run across 3 specialist ReAct agents exposing 33 tools; also built a **Support Ticket Triage Agent** automating first-line ticket classification and routing.
- **Expertise gained:** Multi-agent LLM systems - LangGraph, LangChain, ReAct tool-calling agents on Groq (Llama 3.3 70B) - plus production concerns: security posture, sandboxing LLM-generated code, encrypted secrets, and measuring real impact.

Frontend & Full-Stack Developer Intern, Fletch Technologies Inc

(6-months Semester Internship, fletch.co) , Dec 2025 - May 2026

- **Role:** Rebuilt the entire Fletch **UI/UX** and shipped full-stack features across React, Node.js and Express for Fletch's **no-code widget platform - an embedded and agentic financial-services distribution product** that lets non-technical teams at insurers and insurtechs build and launch quote-to-bind acquisition flows across web, chat and phone with zero engineering.
- **Impact:** Delivered the rebuilt interface to production over a 6-month engagement, enabling marketers to assemble branded, embeddable acquisition widgets without engineering support, on a platform used by carriers including Lemonade, MetLife and Chubb.

Software Engineering Co-op (Training), AlgoUniversity

(2nd year externship | algouniversity.com) , Apr 2025 - Nov 2025

Role: Selected through a competitive 3-stage screening for an elite full-stack and DSA bootcamp, building real-world applications under daily high-pressure sprints.

Impact: Solved 300+ algorithmic problems and shipped working applications end to end on tight sprint deadlines.

PROJECTS

Aurora Ops - Agentic AI for Autonomous IT Operations *Built at EY . Youtube . Github*

- Architected 3 specialist ReAct agents exposing 33 tools on LangGraph state machines, with an LLM orchestrator routing plain-English requests and a self-verifying **diagnose -> decide -> act -> verify chain** that reviews its own remediation before reporting.

- Built a **3-mode transport layer (local, SSH, outbound-polling agent daemon)** so one agent runs unchanged against a laptop with no inbound firewall rule.

- Hardened for production: scrypt at 2× the OWASP floor, SHA-256 opaque tokens, Fernet at rest and an AST sandbox for LLM-generated code; shipped at zero dependency vulnerabilities.

Tech: Python, FastAPI, **LangGraph, LangChain**, ReAct, Groq (Llama 3.3 70B), SQLite, psutil | Next.js, React, TypeScript, Tailwind CSS

Axiom Trade Pulse - Real-Time DeFi Trading Dashboard *Built for EthernaLabs . Youtube . Github*

- Engineered a real-time DeFi trading terminal modelled on Axiom's UX, with **WebSocket-driven live market feeds**, interactive charting and backend **REST API integration**, in a performance-optimised, mobile-first responsive UI that sustains continuous streaming price updates.

Tech: Next.js, React, TypeScript, Tailwind CSS, WebSockets, REST APIs, real-time charting & data visualisation

MatchPulse - On-Chain Verified Sports Predictions *Built for Superteam Int. Hackathon . Youtube . Github*

- Every prediction is **hashed, ed25519-signed and anchored on Solana** before kickoff, making post-hoc manipulation cryptographically impossible.

- Integrated the TxODDS TxLINE feed for real-time scores, odds, win probability and lineups, with SWR polling, relayer-paid transactions and an interactive procedural 3D pitch in React Three Fiber.

Tech: Next.js, React, TypeScript, Solana, TweetNaCl (ed25519), **React Three Fiber**, SWR, TxODDS TxLINE

Renal Tumor Stage Predictor - Machine Learning on MRI Scan Data *Built in IITH Lab*

- Built a machine-learning workflow to classify renal-carcinoma stage from **MRI scan data** -- data cleaning and preprocessing, image normalisation and augmentation, model training, and evaluation against labelled data reviewed by medical practitioners.

Tech: Python, NumPy, Pandas, OpenCV, DICOM/NIfTI medical image data

SKILLS

Technical Skills

AI & Agentic Systems: LangChain, LangGraph, ReAct agents, multi-agent orchestration, RAG, prompt engineering, n8n, Botpress, workflow automation

Machine Learning: Python, NumPy, Pandas, scikit-learn, TensorFlow; supervised learning -- classification, regression, train/test evaluation

Languages: C++, Python, TypeScript, JavaScript, SQL, HTML5/CSS3

CS Fundamentals: Data Structures & Algorithms (500+ problems solved), Object-Oriented Programming (OOP), Operating Systems, DBMS, System Design

Web & Backend: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, REST APIs, WebSockets, MongoDB (Mongoose), SQLite

Tools & Platforms: Git & GitHub, Vercel, Linux/Windows, WordPress, low-code & automation platforms

Leadership & Soft Skills

Leadership & Ownership: Sole ownership of a client-facing product end to end; led cross-departmental teams and campus-scale events at IIT Hyderabad.

Stakeholder Communication: Presented technical architecture, security posture and measured results to senior stakeholders at EY; translates engineering detail for non-technical audiences.

Collaboration & Adaptability: Delivered under hackathon and sprint deadlines across agentic AI, full-stack and Web3 teams; picks up an unfamiliar stack quickly.

ACHIEVMENTS

Avalanche National Hackathon *(Draper House, Hyderabad) Live*

Selected to design, build and pitch TicketVerse, a decentralized NFT ticketing platform with royalty-aware resale, organizer verification and a 3D WebGL front end, before a panel of industry judges.

Rise In National Hackathon (*T-Hub, Bengaluru) Live*

Architected a privacy-first Decentralized Identity (DID) system on Algorand: smart contracts on TestNet, gasless account-abstraction wallet, IPFS-backed verifiable credentials.

Internshala Campus Ambassador -- official Face of Internshala for IIT Hyderabad, selected to represent the institute and drive campus-wide engagement for internships and skilling programmes.

Kaggle & GitHub Badges -- 7 achievement badges on Kaggle and 4 contribution badges on GitHub, reflecting sustained competitive-ML and open-source activity.

POSITIONS OF RESPONSIBILITY

Sports Secretary *(Dept. of Biotechnology, IIT Hyderabad)* -- led logistics for the flagship Sports Day, coordinating 200+ participants across departments.

Marketing Manager *(E-Cell, IIT Hyderabad)* -- directed publicity for E-Summit and E-Merge, driving digital engagement and brand growth.

Alumni Outreach Manager *(IIT Hyderabad)* -- scaled alumni networks and managed Alumni Day 2025 as a high-engagement, multi-generational event.

Event Manager *(Vedic Science Club , IIT Hyderabad)* -- owned end-to-end execution of major campus events; curated cultural-tech programmes for 100+ students.

EXTRACURRICULAR

District-level athlete in **Cricket & Chess** ,official college cricket team member (**NSO - Cricket**).

Multi-sport medalist with 3 podium finishes , FITSOC Fitness Tribe.
