EXPERIENCE

AI Agent Lab Intern (Product Management & Operations) | 360 Technology LLC, USA

- Led product definition and end-to-end development of PlantTwin AI, translating complex industrial telemetry requirements into an enterprise platform powered by Generative AI and autonomous agents.

- Formulated user personas and PRDs for plant control teams, prioritizing LLM-driven root-cause diagnostics and anomaly alerts that cut simulated equipment diagnostic cycle times by 35%.

- Managed cross-functional agile sprints across hardware (Siemens S7-1200 PLC), IoT backend, and UI streams, achieving 100% milestone adherence over a 10-week release cycle.

- Directed end-to-end testing and validation (UAT) with control-room operators, defining core product telemetry KPIs and eliminating alert fatigue through severity-based filtering.

PROJECTS

Cafe POS & Business Intelligence Platform

- Identified key operational bottlenecks in small-business retail checkout flows; designed an intuitive web POS reducing customer billing latency from 7 clicks to 3 clicks.

- Built a business intelligence reporting module tracking hourly footfall, revenue trends, and high-margin SKUs, providing actionable data insights for menu engineering and inventory forecasting.

- Integrated Role-Based Access Control (RBAC) to eliminate internal billing discrepancies, ensuring 100% cash reconciliation accuracy for daily shift closures.

Distributed Low-Bandwidth Messaging Architecture

- Researched user friction in chat applications across high-latency networks; conceptualized a lightweight messaging protocol utilizing MQTT over WebSockets.

- Engineered topic-based room subscription architecture and Base64 message optimization, reducing mobile client bandwidth consumption by 60% compared to traditional HTTP polling.
