EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	6.87
Narayana junior college	Class XII (Telangana State Board Of Intermediate Education)	2023	961.00%
Geetha High School	Class X (Board Of Secondary Education Telangana)	2021	10.00%

POSITIONS OF RESPONSIBILITY

- Coordinator for the web domain in Milan 2024.
- Head for the web domain in Milan 2025.
- Hospitality Coordinator for the Inter-IIT Sports Meet 2025.

SKILLS

- Programming Languages: C, C++, Python.
- Web Technologies: HTML, CSS, JavaScript, React, NodeJS.
- Libraries: NumPy,Pandas,Pytorch,Matplotlib, Seaborn, Scikit-learn, Streamlit, Pickle, PyCharm.
- Databases: SQL .
- Proficient knowledge of Data Structures and Algorithms Decent.
- Understanding of OS and DBMS.

- Chemistry Laboratory: Equipment (XRD, NMR, GC), Data Interpretation and Analysis, Safety Protocols, Instrumentation Techniques, Synthesis and Purification of Compounds, Specimen Analysis.

RELEVANT COURSES

- Introduction to Programming,Artificial IntelligenceI,Calculus1,Calculus2,Probability,Elementary Linear Algebra,Heat and Mass Transfer,Differential Equations,machine learning.

- Chemistry Course: Industrial Organic Chemistry, Environmental Chemistry, Systematic Inorganic Chemistry, Quantum Chemistry, Thermodynamics, Transport Properties, Biochemistry, Fluid Mechanics, Food Technology, Coordination Chemistry and Transition Metal Complexes, Molecular Spectroscopy and its Applications, Polymer Science, Heat and Mass Transfer, Basic Chemistry Laboratory, Industrial Techniques Lab, Synthesis and Separation Lab, Electrochemistry and Energy Conversion, Materials Science, Numerical and Computational Chemistry, Machine Learning in Chemistry

PROJECTS

Laptop Price Predictor Web Application (Machine learning project)

- Built a machine-learning model to predict laptop prices using Regression, Lasso, Ridge, Random Forest, and XGBoost based on features like RAM, processor, GPU, weight, and brand.
- Cleaned and preprocessed the laptop dataset by removing duplicates, handling missing values, converting categorical features into numerical values.
- Trained and evaluated all models using the R^2 score, and selected XGBoost as the best-performing model with an R^2 of 0.88 (88% prediction accuracy).
- Saved the optimized model using Pickle and developed a user-friendly Streamlit web application for real-time laptop price prediction.

Customer Churn Prediction System :

- Developed a machine learning model to predict customer churn using a dataset of 7,000+ telecom customers.
- Conducted comprehensive data preprocessing, including data loading, cleaning exploratory data analysis (EDA) feature
- engineering and addressing class imbalance in the target column with SMOTE.
- Trained, evaluated, and compared multiple classification algorithms--Decision Tree, Random Forest, and XGBoost--to
- identify the most effective model, achieving ~84% accuracy on the test set with Random Forest.
- Implemented a predictive system using the trained Random Forest model to forecast churn for new customers.

Food Delivery Website :

- Created a full-stack food delivery application using the MERN stack to enable seamless user experience and efficient operations.
- Designed a dynamic cart page to manage and display selected items with real-time quantity and price updates.
- Built a responsive home page showcasing an explore menu and category-based filters for intuitive product discovery.
- Stored user data, orders, and restaurant information using MongoDB to ensure scalability and responsiveness.

EXTRACURRICULAR

- Member of National Sports Organization.(NSO) - IITH

CERTIFICATE

- Certificate of Completion - Student Upskilling Launchpad Awarded by Google for dedicated participation and successful completion of all program sessions Date: July 31, 2025
