EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.13
Sardar Patel Public School	Class XII (CBSE)	2023	92.80%
The Sanskaar Valley School	Class X (ICSE)	2021	96.60%

WORK EXPERIENCE

DevRev | MTS Intern, Search & AI Agents Team

Project 1 : RCA Agent For Search in DevRev

- Built an end-to-end RCA agent for customer-reported Search issues, reducing triage time to 1/3rd of the original and enabling autonomous L2/L3-level root-cause analysis.
- Instrumented the Search pipeline with structured logs, distributed traces, and metrics, enabling the agent to correlate telemetry with customer context and identify failure points.
- Redesigned the issue-reporting UI to capture structured debugging context, improving the signal available for automated diagnosis.

Project 2 : Snyk Vulnerability Automation

- Engineered a cross-repository cron job framework for Snyk vulnerability triage and remediation, automatically resolving 90% of identified vulnerabilities.
- Aggregated Snyk API findings with internal work items, automatically generating fix PRs when remediation was available and notifying service owners about remaining downstream vulnerabilities.
- Exposed the framework through local and remote MCP servers, integrating it with internal Developer Tools.
- Built the same functionality for DevRev Computer (DevRev's AI Teammate) to enable this for our customers.

Swaayatt Robots | Deep Learning Intern

- Worked on a research project for path planning using waypoints. Experimented with various Neural Network architectures and Reinforcement Learning techniques to identify optimal waypoint selection strategies based on environmental and task-specific features.
- Implemented a research paper to enable autonomous navigation from natural language commands. Utilized data from RGB cameras, LiDAR, and depth sensors to make predictions and infer paths. The system is being adapted for real-world deployment in drones for vision-and-language-based waypoint navigation.
- Implementations were built in ROS and simulated in Gazebo and used PyTorch for the Deep Learning algorithms.

Cmplai | Tech Lead

- Built a prototype for a copilot to ease document generation for the pharmaceutical manufacturing industry. Fine-tuned an LLM for this usecase by using techniques like RAG, LoRA, QLoRA, and full parameter fine-tuning.
- Made a custom implementation of QLORA with Fully Sharded Data Parallel in PyTorch.
- Developed a custom pipeline to generate large datasets, featuring automated data filtration and augmentation from large texts and web scraping.
- Received grants worth Rs.4,50,000 for this project through the MEITY initiative.

PROJECTS

MeetingBuddy | Link

- Python application designed to boost productivity during online meetings.
- Built a speech-to-text application using Vosk to detect user calls and trigger expected responses. Leveraged multimodal models to provide relevant and dynamic replies based on voice input.

Cancer Detection

- Data Science Project for ongoing Cancer Research

- Developed an automated data analysis pipeline for research, extracting features from OCT images using Scipy and OpenCV. Trained a classifier on these features to predict cancerous samples.

POSITIONS OF RESPONSIBILITY

President, E-Cell at IIT Hyderabad

- Responsible for the planning and execution of flagship events and initiatives such as E-Summit, E-Merge, and Startup Studio, collectively operating with a cumulative annual budget of INR 1.5 million.
- Manage stakeholders and build a high-performing core team.

Software Development Core In Tinkerers Lab IIT Hyderabad

SKILLS

Languages : C/C++, Python, Java, JavaScript, SQL, HTML, CSS, OCaml

Technologies : PyTorch, OpenSearch, OpenCV, Scikit-Learn, Tensorflow, NumPy, Kafka, AWS, Docker, Git

Technical Skills : Machine Learning, Computer Vision, Natural Language Processing, Web Development

Soft Skills : Communication, Teamwork, Decision-making, Time Management

Relevant Courses : Data Structures and Algorithms, Discrete Math, OOPs, Software Development Fundamentals
