EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	6.56
Ram Kishan Institute	Class XII (CBSE)	2013	56.80%
Ram Kishan Institute	Class X (CBSE)	2011	6.60%

SCHOLASTIC ACHIEVEMENTS

First Runner-up in **Programming Competition** in Techfest (2016) **| Radharaman Institute of Technology & Science, Bhopal**

POSITIONS OF RESPONSIBILITY

Head of Hospitality & Logistics | PRAYAS, Rural Development Center, IIT Hyderabad (2025-2026)

- Lead a team of 8 members.
- End-to-end execution under strict deadlines.
- Resource allocation.
- Handling unexpected situation in real time.

Coordinator | Office of Career Services, IIT Hyderabad (2026)

- Pitched the institute's talent pool to companies.
- Proctored campus placement exams, ensuring smooth and fair conduct.
- Served as operations coordinator for Japan Career Day.

SKILLS

Programming Languages: C, C++, Java, JavaScript, Python

Tools & Technologies: Git, GitHub, VS Code, Docker, Kubernetes

Full Stack, APIs & Architecture: System Design, Kafka, HTML, CSS, Express.js, PostgreSQL, REST APIs, GraphQL

Soft Skills: Problem Solving, Critical Thinking, Adaptability, Collaboration, Time & Team Management

RELEVANT COURSES

Technical: Advanced Data Structures and Algorithms, Database Management System, Operating Systems, Computer Architecture and Organisation, Computer Networks & Security, Software Engineering

Non-Technical: Communication Skills

PROJECTS

PRAYAS Campus Tour Management Platform (Personal Project)

Tech Stack: Java, Spring Boot, PostgreSQL, Spring Security (OAuth2), Flyway, React, TypeScript, PWA

- Architected a multi-tenant, role-based coordination platform for a multi-domain student organisation, replacing manual WhatsApp/spreadsheet coordination with a single system spanning multiple volunteers and staff across distinct permission tiers.
- Engineered a concurrency-safe approval pipeline using PostgreSQL advisory locks and JPA optimistic versioning to guarantee daily capacity limits hold under simultaneous approval requests, validated with a Testcontainers-driven race-condition test suite.

- Handled all human and logistical resource allocation tasks, designed to extend to new program add-ons.
- Hardened the public-facing intake API against abuse with CAPTCHA verification, per-IP rate limiting (Bucket4j) and SHA-256-hashed tracking tokens, enabling secure, account-free access for external institutions.
- Built a responsive React PWA delivering an installable multi-step public request form and a role-scoped staff command center for real-time task tracking.

Multi-UAV RF Source Localisation System (Research Project)

Tech Stack: Python, FastAPI, JavaScript HTML/CSS, Leaflet, NumPy, SciPy, REST APIs

- Developed an RF source localization system with Python/FastAPI backend and JavaScript-based web interface for real-time UAV control, telemetry, localization and visualization.
- Designed and implemented intelligent logic to improve the localization accuracy.

EXTRACURRICULAR

Enjoy playing and composing flamenco style music on guitar, going on adventure activities and focusing on physical and mental fitness

Leaning Japanese(Level 11 on duolingo app with 190+ days streak)
