EDUCATION

Institution	Degree / Board	Passing Year	Score / CGPA
Indian Institute of Technology Hyderabad	B.Tech	2027	8.67
MIRS SRIPREMATHUR	Class XII (CBSE)	2023	95.00%
SRI CAHITANYA HOSUR	Class X (CBSE)	2021	93.40%

WORK EXPERIENCE

Founder's Office | Westa Crop India Private Limited.

Built and used SQL-based inventory analysis to monitor stock levels, identify inventory shortages, and flag potential supply gaps for timely operational action.

Conducted **raw-material sourcing research**, evaluating alternative suppliers and sourcing options based on availability, pricing, and operational feasibility.

Researched and explored **LLM applications for business workflows**, identifying opportunities to leverage modern AI tools for research, information organization, and process improvement.

Transformed **quantitative analysis and business research into structured insights**, using data-driven findings to support strategic discussions and decision-making within the Founder's Office.

Worked closely with the **Founder's Office on cross-functional business and operational initiatives**, taking ownership of assigned tasks from research and analysis through execution.

POSITIONS OF RESPONSIBILITY

Alumni Secretary, IIT Hyderabad (2025-2026): Led and mentored a 40-member student team responsible for strengthening engagement across IIT Hyderabad's **5,000+ alumni network**. Spearheaded institute-wide alumni outreach, networking events, and engagement initiatives while **managing 10L+ in cumulative event budgets**. Coordinated closely with alumni, faculty, and student stakeholders to drive multiple initiatives from planning to execution and strengthen long-term institute-alumni relationships.

Teaching Assistant - Introduction to Programming, IIT Hyderabad (2024-25): Supported **600+ first-year students** through doubt sessions, assignments, and assessments; collaborated with instructors to strengthen programming fundamentals and ensure smooth course delivery.

PROJECTS

MentorHour - Lean Startup Validation Project | Product Strategy, Customer Research

Conducted end-to-end validation of a peer-to-peer mentoring marketplace by designing a Business Model Canvas, prioritizing critical product hypotheses, and executing structured customer interviews with **47 students (33 juniors, 14 seniors)**. Analyzed willingness-to-pay and mentor-supply metrics to identify trust as the primary adoption barrier and recommended a **free-trial-first product pivot**, driving evidence-based product strategy and experimentation.

Healthy Snack Shop Feasibility Study | Market Research, Survey Analysis

Conducted primary market research to evaluate the feasibility of a Healthy Snack Shop on campus by designing and administering a structured survey to **34 students**. Analyzed consumer behavior, price sensitivity, product preferences, and purchase drivers, identifying strong demand for healthy snacks, with **68% purchase intent** and **88% expected weekly visitation**, while recommending pricing and product strategies to address affordability concerns.

Netflix Content Analytics | SQL, PostgreSQL, MySQL

Developed an end-to-end SQL analytics project on the Netflix dataset, solving **15+ business problems** related to content distribution, audience ratings, regional trends, genre performance, and content growth. Leveraged advanced SQL techniques including **CTEs, window functions, string manipulation, aggregations, and data transformation** to

generate actionable insights and support data-driven content strategy recommendations.

Product Impact Simulator | Product Analytics, Experimentation, Python

Built a decision-support tool that connected operational metrics to business outcomes by analyzing **96K+ customer records** from an e-commerce marketplace. Combined predictive modeling, causal uplift estimation, and interactive scenario analysis to identify retention drivers, quantify the business impact of delivery delays, and enable data-driven prioritization of product and operational investments.

SKILLS

Analytics & Product: Product Analytics, Product Strategy, Business Analytics, Market Research, Customer Discovery, User Research, Experiment Design, A/B Testing, KPI Definition, North Star Metrics, Funnel Analysis, Cohort Analysis, Statistical Analysis, Hypothesis Testing, Causal Inference, Data Visualization, Dashboard Development, Power BI, Tableau

Programming & Data: Python, SQL (MySQL, PostgreSQL), Pandas, NumPy, Scikit-learn

Product & Analytics Tools: Streamlit, Mixpanel, Google Analytics 4 (GA4), Excel, Jupyter Notebook, Git, GitHub, Matplotlib, Seaborn, Plotly

Leadership & Management: Stakeholder Management, Project Management, Team Leadership, Event Management, Cross-functional Collaboration, Prioritization, Requirement Gathering

Productivity & Collaboration: Notion, Google Workspace, Microsoft Office 365, Jira, Confluence

EXTRACURRICULAR

Built and independently manage a **1L equity portfolio (~8% returns)** through self-directed market research. **Secured 3 medals at Diesta 2025, IIT Hyderabad**--Silver in Badminton and Bronze in Powerlifting (72-77 kg) and Reel Making; **NTSE Stage I Qualifier**. Passionate about **anime culture, manga, and Japanese storytelling**.
